# NLN Simulation in Nursing Education SimMan® Scenarios – Vol. I

Building core nursing competencies in student learners

Enhance your simulation-based education by integrating 20 preconfigured scenarios into your training program – 10 basic and 10 advanced cases designed to challenge nursing students at varying levels. Cases range from obtaining vital signs through recognizing and managing life-threatening medical complications.

These scenarios are mapped to the 2007 National Council Licensure Examination-Registered Nurse (NCLEX-RN) test categories which promote safe and effective care environment, health promotion and maintenance, psychosocial integrity, and physiological integrity.

## Nursing Surgical Core Cases
