

*Building your student's nursing competencies
with training to enhance patient care.*

Nursing Scenarios Volume II for SimMan® and SimMan® 3G Simulators

This package contains 10 core and 10 complex cases that are more advanced than volume I scenarios. These cases will challenge your nursing students to diagnose and treat rare cases in a clinical environment. Medical cases range from sickle cell anemia, experience with malfunctioning pacemaker/defibrillator to renal failure and acute severe pancreatitis.

Scenarios promote:

- Learning with complex scenarios for the advanced student
- Correct patient assessment and management of care
- Guidance in debriefing process with questions that utilize the QSEN (Quality and Safety Education for Nurses) competencies

These scenarios are mapped to the 2007 National Council Licensure Examination-Registered Nurse (NCLEX-RN) test categories and are appropriate to use in any type of undergraduate nursing programs.

The scenarios are designed to operate in a variety of patient settings, including:

• Emergency Departments	• Medical Units
• Intensive Care Units	• Surgical Units

National League for Nursing Scenarios for SimMan® and SimMan® 3G Simulators

FEATURES:

- Includes 20 National League for Nursing (NLN) scenarios with learning objectives
- Product includes learning and support materials
- Contains a Scenario Builder program to allow users to edit or build their own customized training scenarios to meet local learning objectives and protocols
- A list of the 2007 NCLEX-RN® Test Plan Categories outlined to track and match student simulated clinical experiences to the test plan
- A list of debriefing questions utilizing the QSEN competencies outlined to match each scenario
- Patient identification band, a patient information card, a physician order and a data collection form
- The book "Simulation in Nursing Education: from Conceptualization to Evaluation"

BENEFITS:

- Validated by National League for Nursing (NLN)
- Designed to encourage students to assess and manage patients by identifying key factors to allow for critical interventions to be preformed
- Scenario package is designed to:
 - Provide fidelity within the simulation
 - Determine the appropriate level of complexity
 - Imbed cues and provide adequate debriefing opportunities using the Quality and Safety Education for Nurses (QSEN) competencies

211-17301 National League for Nursing Scenarios for SimMan and SimMan 3G, Vol. II

Scenarios run on SimMan software version 3.3.1
Scenarios run in "Instructor Mode" on SimMan 3G

SCENARIOS:

Scenario 1

Spinal Cord Injury - Brandon Sharp
Core Case - Skin integrity
Complex Case - Autonomic Dysreflexia

Scenario 2

Cerebral Vascular Accident - William Edwards
Core Case - Aspiration
Complex Case - Acute Ischemic Stroke

Scenario 3

Pacemaker - Liling Sung
Core Case - Non-capture
Complex Case - AICD Misfire

Scenario 4

Congestive Heart Failure-Charles Jones
Core Case - Medication Management
Complex Case - Severe Fluid Overload

Scenario 5

Sickle Cell Anemia - Tony Wallace
Core Case - Exacerbation with Pain Management
Complex Case - Acute Chest Syndrome

Scenario 6

Altered Renal Function - Bobby Davis
Core Case - Renal Colic Pain Management
Complex Case - Acute Kidney Injury

Scenario 7

Gastrointestinal Bleeding - Valerie Jones
Core Case - Stable
Complex Case - Unstable

Scenario 8

Pancreatitis - Maria Gonzales
Core Case - Mild
Complex Case - Severe

Scenario 9

Hip Fracture - Ruth Livingston
Core Case - Impaired Mobility
Complex Case - Altered Mental Status

Scenario 10

Liver Cirrhosis - Dale Mayman
Core Case - Chronic Disease Management
Complex Case - End-stage Disease
