50 years of helping save lives 1958 - 2008

www.laerdal.com
From basic to advanced simulators

Åsmund S. Laerdal using Resusci Anne manikin as a simulated drowning victim in the early 1960's.
50 years of evolving needs and solutions

1960  The need for a lifelike training aid for mouth-to-mouth ventilation, and to make rescuers willing to blow into a “dead” person, led Asmund S. Laerdal, together with Dr. Bjorn Lind and Dr. Peter Safar to develop Resusci-Anne.

1970  The first AHA/JAMA Guidelines for CPR in 1974 recommended that full CPR be taught also to lay people. Recording Resusci Anne allowed “training to perfection”, reporting quality of CPR on a paper strip.

1980  In the 1980's the American Heart Association set a criteria of 90% correct performance to obtain CPR certification: SkillMeter Resusci Anne was developed to meet the need for quantitative real-time CPR measurement and feedback.

1990  In the 1990's there was much focus on sufficient hands-on practice. Little Anne was introduced (1995) as a supplemental trainer to meet the need for a lower student to manikin ratio.

2000  In the 2000's growing concern about patient safety and cost-efficiency caused increased focus on patient simulation and self-directed learning.

OUR LATEST SOLUTIONS

SELF-DIRECTED LEARNING  QUALITY CPR  SIMULATION

www.laerdal.com
The peaceful-looking and yet mysterious death mask of the girl who drowned herself in the Seine: The inspiration for Anne’s face.

Laerdal’s commitment to helping save lives is deeply founded in a strong dedication to improve patient survival. For 50 years we have strived continuously to develop needs-based products and solutions to meet your educational and clinical needs.
identifies three main factors which predict the strength of any local Chain of Survival, expressing its potential of successful resuscitation outcome.

Through 50 years Laerdal has been challenged by a desire to increase educational efficiency in resuscitation at all levels. In 1960 we introduced Resusci Anne to facilitate learning mouth-to-mouth resuscitation by anyone, anywhere. Having built a wide and versatile product range over the many years, we are today partnering with many medical communities to improve competencies at different levels of health care personnel through the use of advanced simulators.

The Chain of Survival

is generally accepted as a description of the timely events and treatment it takes for victims to survive unexpected cardiac arrest.

The Utstein Formula of Survival*

describes an acknowledged way through five cyclical steps to recognised competence in resuscitation knowledge, skills and clinical practice. Laerdal offers preferred product solutions for all of these steps.

Resusci Anne Basic and SkillGuide

Quality CPR training with real-time feedback

The Resusci Anne Basic and Resusci Anne SkillGuide manikins offer optimal realism and quality to adult CPR education. With its modular construction, and use of the optional SkillGuide performance indicator, students can quickly sharpen their skills to perform adult quality CPR. Add first aid or rescue limbs to integrate first aid, trauma, and extrication to the training.

Resusci Anne Full-Body comes standard with non-articulating arms and legs. First Aid Trauma Modules available, see page 22.

310210 Face Skin (pkg. 6)
310220 Face Skin, decorated (pkg. 6)
152250 Airways (pkg. 24)
15120103 Manikin Face Shields (6 rolls of 36 each)
Resusci Anne SkillReporter

Quality CPR training with real-time feedback and evaluation report

The Resusci Anne SkillReporter is an adult quality CPR training manikin that focuses on student performance through printed reports on ventilation and compression compliance. In addition, first aid and extrication practice can be incorporated into the learning by adding the optional first aid and rescue limbs.

Resusci Anne CPR Manikin Includes:
Torso/Full-Body Manikin, 4 Decorated Resusci Manikin Faces, 3 Disposable Manikin Airways, Carry Case, Track Suit (Full-Body Models) or Jacket (Torso Models), SkillReporter unit with 1 roll of Printer Paper, Directions for Use and Virkon Rapid Pack.

Resusci Baby Basic and SkillGuide

Quality CPR training with real-time feedback

The Resusci Baby manikin offers realism and quality to infant CPR education. Its full-body construction, and use of the optional SkillGuide performance indicator enable students to quickly sharpen their skills in performing infant quality CPR.

Resusci Baby Manikin Includes:

Consumables

143700 Resusci Baby Airways (pkg. 24)
13600 Resusci Baby Faces (pkg. 6)
13701 Resusci Baby Airways (pkg. 96)
15120103 Manikin Face Shields (6 rolls of 36 each)
Little Anne

Realistic and inexpensive quality CPR training

The Little Anne manikin has been developed to provide effective adult CPR training without compromising realism or quality. Its durable and convenient design makes hands-on practice affordable for every student.

Now available in a 4-pack with carry bag.

Little Anne Manikin Includes:
1 Manikin, Soft Pack/Training Mat, 2 Resusci Manikin Faces, 2 Little Anne Airways, Virkon Rapid Pack and Directions for Use.

Little Anne 4-Pack Manikin Includes:
4 Manikins, 4-Pack Carry Case, 8 Resusci Manikin Faces, 8 Little Anne Airways, 4 Virkon Rapid Packs and Directions for Use.

183010 Junior Faces (pkg. 6)
183015 Junior Faces, dark skin (pkg. 6)
Baby Anne

Realistic and inexpensive quality CPR training

The Baby Anne manikin was developed to provide effective infant CPR training without compromising realism or quality. The convenient packaging of four Baby Anne manikins makes hands-on practice affordable for every student.

Baby Anne Manikin Includes:

1 Manikin, Soft Pack, 6 Airways, 10 Foreign Body Practice Objects and Directions for Use.

Baby Anne 4-Pack Manikin Includes:

4 Manikins, 4-Pack Carry Case, 24 Airways, 40 Foreign Body Practice Objects and Directions for Use.

Consumables

050000 Baby Anne

050002 Baby Anne Dark Skin

050010 Baby Anne 4-Pack

050012 Baby Anne 4-Pack Dark Skin

Release of foreign-body obstruction can be practised.

050200 Baby Anne Faces (pkg. 6)

050100 Airways (pkg. 24)

05 03 00 Foreign Objects (pkg. 10)

15120103 Manikin Face Shields (6 rolls of 36 each)
Little Family

All-in-one — realistic and inexpensive quality CPR training

Laerdal brings you realistic, affordable, quality CPR training in one “Little” family package — the Little Family Pack. Designed to reflect the realistic anatomical differences among an adult, a child, and an infant. The Family Pack comes complete with one Little Anne, one Little Junior, and one Baby Anne, all in one convenient case. It is functional realism with all the essential features. Your students will benefit from the most realistic, age-specific manikins on the market today - and you’ll benefit from the convenience. **With this package we will also supply a packet of airways for each manikin and a box of face shields (6 rolls of 36) for free.**

AED Little Anne Training System

Realistic and inexpensive quality CPR and AED training

The AED Little Anne Training System is a complete product offering that combines the affordable AED Little Anne manikin, Laerdal AED Trainer 2, and remote control into one affordable CPR-D training package. The unique design feature of the AED Trainer 2 is that it will not advance in the scenario until proper pad placement on the patient’s chest is accomplished.

AED Little Anne Training System Includes:
Laerdal AED Trainer 2 w/Soft Pack, Remote Control, AED Little Anne Manikin w/Softpack Training Mat, Accessories, Laerdal LINK Training Pads and Directions for Use.

AED Little Anne Includes:
Manikin, Soft Pack/Training Mat, Zippered Jacket, 2 Faces and 2 Airways, Virkon Rapid Pack and Directions for Use.

Consumables

- 310210 Face Skin (pkg. 6)
- 020300 Airways, complete (pkg. 24)
- 020301 Airways, complete (pkg. 96)
- 945090 Laerdal LINK Training Pads
Resusci Anne CPR/D

Quality CPR and live defibrillation training with real-time feedback and evaluation report

The Resusci Anne CPR-D is an adult CPR training manikin focusing on quality CPR and defibrillation actions during the scenario. The combination of the Micro-Heartsim and SkillReporter modules allows comprehensive instructor-to-student debriefing and documentation of key events. Additionally, first aid and extrication practice can be incorporated into the learning by adding the optional first aid and rescue limbs.

Resusci Anne Full-Body comes standard with non-articulating arms and legs. First Aid Trauma Modules available. See page 22.

(Defibrillator not included)

32002515 Resusci Anne CPR-D Torso w/Hard Case and Training Mat

32005515 Resusci Anne CPR-D Full-Body w/Hard Case and Training Mat

Resusci Anne CPR-D Manikin Includes:

Manikin, 4 Decorated Resusci Manikin Faces, 3 Disposable Manikin Airways, Carrying Case, Track Suit (Full-Body Models) or Jacket (Torso Models), Directions for Use, SkillReporter unit with 1 roll of Printer Paper, Micro-HeartSim hand-held control unit and Training Electrodes.

Consumables

310210 Face Skin (pkg. 6)

310220 Face Skin, decorated (pkg. 6)

152250 Airways (pkg. 24)

15120103 Manikin Face Shields (6 rolls of 36 each)

315050 Paper for SkillReporter (pkg. 5)

For more information on the optional Laerdal PC SkillReporting tool, see page 23.
Resusci Anne Q-CPR/D training system

Quality CPR training with live defibrillation and Q-CPR Technology

Resusci Anne Q-CPR/D training system allows for training with the Q-CPR function on the HeartStart MRx defibrillator. The system allows for defibrillation, Q-CPR and airway management training. The airway head is designed for controlled ventilations through use of endotracheal tube, laryngeal mask or bag-valve-mask ventilations.

The Q-CPR Training Module provides ECG to the defibrillator and accepts shocks. It also provides ventilation data to the HeartStart MRx.

ECG and shock response is controlled from the Micro-HeartSim.

With the use of the optional SkillReporter printer or the PC SkillReporter comprehensive debriefing documentation can be generated.

199–10050 Q-CPR Training Module. Must be bought separately.

The Q-CPR Training Module can be connected to any Resusci Anne CPR/D training manikin and to the special Resusci Anne Q-CPR / D manikin. The module connects directly to the HeartStart MRx defibrillator contact.

199-00050 Resusci Anne CPR-D Torso with Airway Head.

199-05050 Resusci Anne CPR-D with Airway Head.

Includes MicroHeartSim ECG simulator.

Consumables

252090 Airway Lubricant

315050 Paper for SkillReporter (pkg. 5)

For more information on the SkillReporter unit see page 9. (SkillReporter not included)

For more information on the optional Laerdal PC SkillReporting tool, see page 23

The Quality Circle (see pages 92-93)
AED Resusci Anne **SkillGuide & SkillReporter**

Quality CPR and AED training with real-time feedback and evaluation report

The AED Resusci Anne is an adult quality CPR manikin developed specifically to work in combination with the Laerdal AED Trainer 2 device using Laerdal Link Technology. Additionally, first aid and extrication practice can be incorporated into the learning by adding the optional first aid and rescue limbs.

Laerdal AED Trainer not included. See page 111.

For more information on the optional Laerdal PC SkillReporting tool, see page 23.

AED Resusci Anne Manikin Includes:

- Manikin, 4 Decorated Resusci Manikin Faces, 3 Disposable Manikin Airways, Carry Case, Track Suit (Full-Body Models) or Jacket (Torso Models), Virkon Rapid Pack and Directions for Use.
- Models listed as “SkillGuide” include the SkillGuide unit. Models listed as “Skill-Reporter” include SkillReporter unit with 1 roll of Printer Paper.

For more information on the SkillGuide unit see page 8.
For more information on the SkillReporter unit see page 9.

Resusci Anne First Aid/Trauma Modules

Add-on modules for any Resusci Anne manikin

The practice of first aid and trauma skills has become an important and integral part of many CPR and CPR-D courses. Our wide range of First Aid and Trauma modules are designed specifically to support practice of the important skills of first aid and trauma management.

Simple arm and leg attachments allow you to build the manikin of your choice within seconds. No tools required.

312000 Rescue Module w/Soft Pack
090050 Bleeding Control Leg
312025 IV Arm
312050 First Aid/Trauma Module w/Soft Pack
312053 Leg Assembly Right w/Wounds
312052 Leg Assembly Left w/Wounds
Laerdal PC SkillReporting System

Quality CPR training and evaluation tool

The Laerdal PC SkillReporting System offers an approach to CPR or CPR-D training with Resusci Anne by integrating the benefits of a desktop or laptop PC to your training. The system includes an extensive student/course administration functionality. When accurate documentation of student performance is a requirement or you would like to run and control multiple manikins from one PC, then this is the perfect tool for you.

317000 Laerdal PC SkillReporting System (includes: Program CD and Interface Cable)

With the Laerdal PC SkillReporting System you can operate multiple Resusci Anne SkillReporter manikins with one PC.

Now available in the following languages:
English, Norwegian, Swedish, Dutch, Japanese, French, Finnish, Italian, German, Korean, Spanish, Russian, Polish, Chinese.

* One of the following Resusci Anne models are required: Resusci Anne SkillReporter, Resusci Anne Advanced SkillTrainer or Resusci Anne Simulator

Computer not included

Resusci Anne Airway Trainer Update Kit

The Resusci Anne Airway Trainer simulates complete anatomy of the vocal cords. This provides a useful addition to the basic Resusci Anne manikin to allow training in basic and intermediate airway techniques. The skin is highly elastic and durable and movement is realistic, enabling training simulations which are as close to reality as possible.

316000 Resusci Anne Airway Trainer Update Kit - Basic

Fits the following Resusci Anne Models:
- Resusci Anne Basic: 310005, 310006, 310035
- Resusci Anne SkillGuide: 310015, 310016, 310045, 320060, 320080
- All discontinued Resusci Anne models that have disposable airways (except Resusci Anne Skillmeter).

316200 Resusci Anne Airway Trainer Update Kit - SkillReporter

Fits the following Resusci Anne Models:
- Resusci Anne SkillReporter: 310025, 310055, 320070, 320090, 320025, 320055
- Resusci Anne SkillMeter: 300010

Consumables

252090 Airway Lubricant

Includes:
Airway Head, Lung, Stomach, Resusci Anne Simulator Eye Set,
(1) can Airway Lubricant, Directions for Use
Tuff Kelly

The full-body manikin with realistic weight for extrication and rescue training

The Tuff Kelly line of manikins is durable and robust and of realistic weight. They can be used for a wide variety of extrication-training scenarios. The optional BTLS Victim Injury Set allows Tuff Kelly to be used in trauma and first aid scenarios.

101-00001 Tuff Kelly 45 kg
101-05001 Tuff Kelly 70 kg
101-07501 Tuff Kelly 80 kg

Tuff Kelly Includes:
Manikin, Coveralls, Work Boots, Positioning Waist Belt with “D” rings, and Directions for Use.

Extri Kelly

The realistic and rugged extrication training manikin

Extri Kelly is a durable, rugged, fully articulated training manikin ideal for extrication and rescue exercises. Extra weight can be added, allowing the instructor to replicate victims of various weights.

101-10001 Extri Kelly

Extri Kelly Includes:
Manikin and Directions for Use.
Crash Kelly

The manikin which combines training in extrication with airway management

Crash Kelly is a durable, rugged training manikin with an intubation head for advanced airway management training and realistic articulation allowing the manikin to be placed in various settings for extrication or rescue. Crash Kelly is the ideal manikin for training in airway management, extrication and rescue exercises.

201-10001 Crash Kelly
Crash Kelly Includes:
Manikin, Manikin Lubricant, Assembly Tool Kit and Directions for Use.

First Aid Training Manikin

CPR and First Aid training in one rugged manikin

First Aid Training Manikin is the perfect partner for training that focuses on the practice of first aid. This rugged manikin comes complete with a number of modules to re-create multiple first aid situations.

100-10001 First Aid Training Manikin
First Aid Training Manikin Includes:
Manikin, Jacket, Pants, Soft Carry Case, 3 CPR Mouthpieces, 100 Disposable Airways and Simulated Blood.

Consumables

100-00450 Airways (100)  300-00750 Simulated Blood  100-00150 Mouthpieces (6)
Ultimate Hurt

The multi-function manikin for rescue, extrication, and trauma care

The Ultimate Hurt is a superior trauma and extrication manikin with three interchangeable heads: standard and trauma intubation heads and Mr. Hurt Head. He comes with a wide range of trauma wound modules to enhance scenarios.

201-00001 Ultimate Hurt

Ultimate Hurt Includes:
Manikin, Heads (3), Wound Set, Manikin Lubricant, Jacket, Pants,
Carry Case and Directions for Use.

Consumables

250-21050 Airway Lubricant
45 ml
Trauma Module Set

Trauma Module Set may be added to adult manikins for realism in trauma life support and lifesaving first aid scenarios.

276-10001 Trauma Module Set

Fits:
100-10001 First Aid Training Manikin (see page 20)
101-10001 Extri Kelly (see page 19)
201-10001 Crash Kelly (see page 20)
201-00001 Ultimate Hurt (see page 21)

BTLS Victim Injury Set

A set of wound lay-ons, blood splats, and simulated blood designed for use on manikins or humans to simulate injuries required in the BTLS Instructor’s Manual.

275-00001 BTLS Victim Injury Set

Trauma Make-Up

Set of materials compiled for moulaging realistic trauma, such as cyanosis and burns on both humans and manikins.

275-10001 Trauma Make-up
New to Laerdal...

**Little Family**

*All-in-one — realistic and inexpensive quality CPR training*

Laerdal brings you realistic, affordable, quality CPR training in one “Little” Family package — the Little Family Pack.

See page 12-15 for more information on both these packages

**NEW Little Family package**

**Little Anne 4-Pack**

*Realistic and inexpensive quality CPR training*

The Little Anne manikin has been developed to provide effective adult CPR training without compromising realism or quality. Its durable and convenient design makes hands-on practice affordable for every student.

Little Anne 4-Pack Manikin Includes:

- 4 Manikins, 4-Pack Carry Case, 8 Resusci Manikin Faces,
- 8 Little Anne Airways, 4 Virkon Rapid Packs and Directions for Use.

NEW Little Anne 4-pack
(image displays bag to suit)
Laerdal ALS Baby

Advanced skills training for infant emergencies

The Laerdal ALS baby is a portable skill trainer for realistic infant resuscitation training. Laerdal ALS Baby mannequin is a three-month-old infant with an anatomy that offers exceptional realism for individual training. The Laerdal ALS baby offers the opportunity to practice advanced resuscitation skills, including airway management, professional rescuer CPR, vascular access, and 4 connectors, 3-lead ECG monitoring.

Laerdal ALS Baby 200 (Complete) Includes:

ALS Baby Manikin, Molded Plastic Carry Case, 5 IO Leg Replacement Pads, Pulse Bulb, Lubricant Jelly, HeartSim 200 and Directions for Use.

Laerdal ALS Baby Includes:

Consumables

252090 Airway Lubricant
082305 Leg Replacement Pads (pkg. 5)
082025 Lungs/Stomach (pkg. 6)
The VitalSim Vital Signs Simulator is the heart of Laerdal’s VitalSim product line. When connected to VitalSim-enabled manikins and skills trainers, VitalSim simulates ECGs, heart tones, fetal heart sounds, breath sounds, bowel sounds, blood pressure and pulses. VitalSim also allows instructors to run pre-programmed scenarios as well as write their own custom scenarios to meet their specific learning objectives. Data logging and download functions provide valuable information for use in performance assessment and debriefing.
200-10001  VitalSim

**VitalSim Vital Signs Simulator Includes:**

Control Unit including Battery Case and Batteries (6), Remote Control including Batteries (4), Operating Device to Control Unit Cable, USB Cable for connection to PC, AC Adapter, Software CD, Carry Case, and Directions for Use.
The VitalSim Configuration Chart is a guide to help you create the ideal training manikin. Simply select your Focus, Pre-Hospital or In-Hospital/Nursing; the Targeted Patient, adult, paediatric or infant; VitalSim Capabilities, complete, ECG only or none; and finally choose the Accessories that will complete your training objectives. Please contact your sales representative for further assistance.

VitalSim Capabilities

Cardiac Related
- Synchronised variable rate rhythm, abnormalities, and duration
- Programmable waiting rhythms
- Programmable scenario-based algorithms for instructor control
- 3- or 4-lead ECG, pacing and defibrillation capabilities (25–360j)

Blood Pressure / Pulses
- Blood pressure arm for auscultation and palpation of blood pressure
- Korotkoff sounds synchronised with ECG
- Korotkoff sounds volume control in 10 steps, 0–9
- Systolic and diastolic pressure may be set individually in steps of 2 mmHg
- Systolic 0–300 mmHg, Diastolic 0–300 mmHg
- Auscultatory gap, on/off feature
- Calibrate function to adjust pressure sensor and cuff gauge
- Palpated pulse simulator controls bilateral carotid and brachial and radial pulses in the BP arm
  - Pulses only active when palpated
  - Pulses synchronised with programmable ECG
  - Pulse strengths dependent on BP

Sounds
- Heart sounds synchronised with programmable ECG
- Lung sounds synchronised with breathing rate, 0 - 60 BPM
- Individual lung or bilateral sound selection
- Normal and abnormal bowel sounds
- Computer-generated sounds, mixed with voice input via amplified microphone (sold separately)

Logging/Scenario Functions
- Up to ten scenarios can be uploaded into the VitalSim Control Unit
- Scenarios can be created or modified using the PC Editor
- VitalSim control unit can be connected to a PC via USB cable
- Download up to 25 logs for “after-action” review/debriefing

Laerdal Infant Airway Management Trainer

The most realistic tool for practising the specialised skills required for infant airway management

Realistic practice is the key to developing proficiency in airway management skills. The Laerdal Infant Airway Management Trainer provides the realistic anatomy of a three-month-old infant for teaching and practising basic and advanced airway management skills.

250-00250  Laerdal Infant Airway Management Trainer

Laerdal Infant Airway Management Trainer Includes:
Infant Trainer, Airway Lubricant and Directions for Use.

Laerdal Neonatal Intubation Trainer

Ideal for newborn intubation training

Laerdal Neonatal Intubation Trainer allows teaching of intubation skills on the newborn baby. Robust and realistic, this model allows students to undertake training that is directly transferable to the clinical setting.

250-00101  Laerdal Neonatal Intubation Trainer

Laerdal Neonatal Intubation Trainer Includes:
Neonatal Trainer, Manikin Lubricant and Directions for Use.

Consumables

250-21050  Airway Lubricant 45 ml
Cricoid Stick Trainer

*Simulating realistic needle and surgical cricothyrotomy*

Needle and surgical cricothyrotomy skills can be practised on this model with interchangeable rigid and soft tracheas, that also articulates to a range of adult manikins.

261-01001  Cricoid Stick Trainer

Cricoid Stick Trainer Includes:
Head, Rigid Trachea with Simulated Lung, Soft Trachea with Simulated Lung, and Replaceable Neck Skin.

**Consumables**

- 261-01150  Replaceable Trachea – Rigid
- 261-01250  Replaceable Trachea – Soft
- 261-01350  Replacement Neck Skin

Choking Charlie

*Designed specifically for training of the Heimlich Abdominal Thrust Manoeuvre*

The Choking Charlie manikin is an adult torso designed specifically for training students in the performance of the Heimlich Abdominal Thrust Manoeuvre. Realistic anatomy and response using simulated boluses provide instructors with an excellent tool for instructing and practising this lifesaving technique.

102-00001  Choking Charlie

Choking Charlie Manikin Includes:
Torso, 4 Simulated Boluses, Talcum Powder, Tank Top, and Carry Case.

**Consumables**

- 102-00150  Simulated Boluses (4)
The Pneumothorax Trainer, with bilateral tension pneumothoraces and decompression portals in each axilla and sub-clavian region, is specifically designed for training professionals in the practice of chest decompression.

**Pneumothorax Trainer**

**Pneumothorax Trainer Includes:**
Torso Manikin, Bladder Replacement Kit, Manikin Lubricant, Tank Top, Carry Case, and Directions for Use.

**Consumables**

- 250-21050 Airway Lubricant 45 ml
- 200-00150 Bladder Replacement Kit

www.laerdal.com
**12-Lead Task Trainer**

Adult male upper torso with anatomically accurate landmarks designed for 12-lead training.

**260-20001  12-Lead Task Trainer**

**12-Lead Task Trainer Includes:**
Adult Manikin Torso with Electronics, Wired Remote Control, “C” Cell Batteries, Manikin Lubricant, Tank Top, Carry Case, and Directions for Use.

**Consumables**

**250-21050  Airway Lubricant**

45 ml

**Blood Pressure Training Arm**

Lifelike adult arm with electronic trainer designed for training the procedure of NIBP measurement.

**375-40501  Blood Pressure Training Arm**

**The Blood Pressure Training Arm Includes:**
Adult Arm, Blood Pressure Trainer, Cuff, 9-Volt Battery, Trainer Controller, and Carry Case.
Mr. Hurt Head Trauma Trainer

Realistic cranial trauma management

Cast from an actual victim of a highway accident, Mr. Hurt Head Trauma Trainer presents students with a variety of trauma conditions. This trainer comes mounted to a base, but can be easily transferred to adult manikins for use in full-body trauma scenarios.

261-02001  Mr. Hurt Head Trauma Trainer
VitalSim Task Trainers

VitalSim Arrhythmia Trainer*

200-20250 VitalSim Arrhythmia Trainer

Arrhythmia Trainer Includes:
Arrhythmia Box with Connection Cable and Soft Carry Case.

* Must be used with VitalSim (sold separately). See pages 30-31.

VitalSim Sounds Trainer*

200-20150 VitalSim Sounds Trainer

Sounds Trainer Includes:
Four Auscultation Speakers, a Connection Cable and Soft Carry Case.

* Must be used with VitalSim (sold separately). See pages 30-31.

VitalSim Blood Pressure Trainer*

375-42050 VitalSim Blood Pressure Trainer

Blood Pressure Trainer Includes:
Female Blood Pressure Arm with Connection Cable, Blood Pressure Cuff, and Soft Carry Case.

* Must be used with VitalSim (sold separately). See pages 30-31.
Male Multi-Venous IV Training Arm Kit

Lifelike arm reproduction with multi-vein system designed for peripheral intravenous therapy.

270-00001 Male Multi-Venous IV Training Arm Kit
380700 Male Multi-Venous IV Training Arm

Multi-Venous IV Training Arm Kits Include:
Arm, Replacement Skin and Multi-Vein System, Simulated Blood, Blood Bag with Tubing and Connector, Clamp and Hook, 5 Syringes, Manikin Lubricant, Carry Case, and Directions for Use.

Female Multi-Venous IV Training Arm Kit

Lifelike arm reproduction with multi-vein system designed for peripheral intravenous therapy.

375-50001 Female Multi-Venous IV Training Arm Kit
375-51001 Female Multi-Venous IV Training Arm

Consumables

250-21050 Airway Lubricant 45 ml
300-00750 Simulated Blood – Red
312029 Replacement Skin & Vein System – Male
325-00350 Replacement Skin & Vein System – Female
Paediatric Multi-Venous IV Training Arm Kit

Lifelike arm reproduction with multi-vein system designed for peripheral intravenous therapy.

375-70001 Paediatric Multi-Venous IV Training Arm Kit
375-71001 Paediatric Multi-Venous IV Training Arm

Multi-Venous IV Training Arm Kits Include:
Arm, Replacement Skin and Multi-Vein System, Simulated Blood, Blood Bag with Tubing and Connector, Clamp and Hook, 5 Syringes, Manikin Lubricant, Carry Case, and Directions for Use.

Arterial Arm Stick Kit

Lifelike adult male arm reproduction with infusible arteries designed for training the proper arterial puncture procedure for blood gas analysis.

375-80001 Arterial Stick Arm Kit
375-81001 Arterial Stick Arm

Arterial Arm Stick Kit Includes:
Adult Male Arm, Replacement Skin and Artery Set, 5 Syringes, Simulated Blood, Manikin Lubricant, Carry Case, and Directions for Use.

Consumables

250-21050 Airway Lubricant 45 ml
300-00750 Simulated Blood – Red
375-70150 Replacement Skin & Vein System – Paediatric
375-80150 Replacement Skin & Arteries
Laerdal IV Torso

*The most realistic tool for adult IV training*

The Laerdal IV Torso allows practicing of intravenous access techniques for both advanced cardiac life support and trauma, delivered by organisations around the world. The IV Torso has been specifically designed to meet the key educational goals of training programs.

090019    Laerdal IV Torso

**Laerdal IV Torso Includes:**
- Carry Case
- 1 bottle of Simulated blood
- 1 Set of IV Pads
- Directions for Use

AT Kelly Torso

*Central venous access training with the added feature of chest decompression*

The AT Kelly Torso was designed for training central venous access and chest decompression with the added benefit of airway management features.

260-00001    AT Kelly Torso

**AT Kelly Torso Includes:**
- Adult Torso
- Bladder Replacement Kit
- Manikin Lubricant
- Tank Top
- Carry Case

Consumables

- 092001    Neck Replacement Pad
- 092003    Femoral Replacement Pad
- 092103    Simulated Blood
- 250-21050    Airway Lubricant 45 ml
- 200-00150    Bladder Replacement Kit
Vascular Access

Chester Chest

Lifelike model of human torso with detachable right arm designed for the insertion care, and removal of common long-term vascular access routes.

VT-400P  Chester Chest
VT-501  Carrying Case for Chester Chest

Chester Chest Includes:
Torso w/Neck and Chin, Detachable Right Arm, Blood Reservoir Bags, Tubing and Baby Powder.

Peter PICC Line

Upper torso model with right arm designed for practising insertion, care, and removal of Peripherally Inserted Central Catheter Lines.

VT-600  Peter PICC Line

Peter PICC Line Includes:
Lightweight Torso with Moveable Chin, Complete Vein Set, Fluid Bag, and Tubing, Supply Case, and Carry Case.

Consumables

Chester Chest
VT-405  Outer Tissue Flap Replacement
VT-406  Generic Port – IVAD
VT-407  Central Venous Catheter– CVC
VT-408  PICC Line
VT-420  Difficult Accessing Insert
VT-430  Difficult Accessing Insert
VT-440  Difficult Accessing Insert
VT-609  Simulated Blood Reservoir Bag

Peter PICC Line
VT-491  Simulated Blood – 1 qt
VT-601  Arm Vein Tubing Set
VT-602  Body Vein Tubing Set
VT-603  Replacement Arm Skin
VT-604  Replacement Body Skin
Femoral Access Trainer

The Femoral Access Trainer is an adult lower torso reproduction with realistic anatomical landmarks and infusible venous and arterial systems designed for teaching femoral access procedures.

262-00001 Femoral Access Trainer

The Femoral Access Trainer Includes:
Lower Torso, 5 Syringes, 3 IV Bags with Hoses and Clamps, Blood Concentrate – 1 Blue - 1 Red, Manikin Lubricant, Carry Case and Directions for Use.

IM Hip Task Trainer

The IM Hip Task Trainer allows Visualisation of the relationship of bone to muscle while training the administration of medication via dorsogluteal injection.

375-34501 IM Hip Task Trainer
261-02150 Carry Case
## Respiratory and Wound Care Task Trainers

### NG Tube and Trach Care Trainer
Torso task trainer designed for instruction in the care of patients with respiratory conditions and the practice of gastrointestinal care procedures via nasal and oral access.

375-10001 NG Tube and Trach Care Trainer

NG Tube and Trach Care Trainer includes:
- Adult Male Torso
- Manikin Lubricant
- Tank Top
- Carry Case
- Directions for Use

### Consumables
- 250-21050 Airway Lubricant 45 ml
- 300-00850 Trach Plug

### Wound Care Model
Moulded from a 74-year-old patient, this model allows training in wound cleansing, classification, staging, and assessment.

VT-900 Wound Care Model
VT-901 Carrying Case for Wound Care Model
Catheterisation and Enema Trainer

Interchangeable Catheterisation and Enema Task Trainer

Life-size female pelvis with interchangeable genitalia designed for practising urologic and rectal access gastrointestinal care procedures.

375-21001  Catheterisation and Enema Trainer
375-21350  Health Care In-service Wounds
325-00450  Fundus Skills Module

Catheterisation and Enema Trainer Includes:
Adult Female Pelvis with Upper Thighs, Male and Female Genitalia,
6 Connectors and Carry Case.

Consumables

300-00150  Thigh Injection Pad
300-00250  Ventrogluteal Injection Pad – Male
325-00150  Ventrogluteal Injection Pad – Female
300-00350  Gluteal Injection Pad – Male
325-00250  Gluteal Injection Pad – Female
300-00450  Valve/Clamp Set – Anal (pkg. 3)
380475    Pelvic Pin
325-00250  Valve/Clamp Set – Urinary (pkg. 3)
Fundus Skills and Assessment Trainer

The Fundus Skills and Assessment Trainer features the normal anatomy of the status-post or postpartum female abdomen designed for training fundus assessment and massage skills.

The Fundus Skills and Assessment Trainer includes:

Consumables

- 277-00150 Baby Powder
- 300-00750 Simulated Blood – Red
Childbirth and Development

Life in the Womb Prenatal Education Set

Easily review development from conception to six weeks post-partum with this product.

43319 With Child Life-Size Display (only)

---

Head Section Model

Model designed to demonstrate the difference between open and closed airway.

010900 Head Section Model
Baby Umbi

Female newborn infant reproduction designed for the practice of Umbilical catheterisation.

250-00501 Baby Umbi

Baby Umbi includes:

Baby Umbi Trainer, Umbilical and Directions for Use.

Consumables

240-00150 Umbilical Cord Set (3) Skin and Vein

240-00250 Simulated Umbilical Blood

Neonatal Skills Trainers

Baby Ivy

Simulated infant head with internally moulded scalp veins designed for practising neonatal peripheral venous access.

375-30001 Baby Ivy

Baby Arti

Lifelike reproduction of an infant arm with bony structures allows students to master the technique of neonatal radial artery puncture.

375-32001 Baby Arti
Neonatal Skills Trainers

Baby Stap

Reproduction of a neonatal infant positioned for the practice of lumbar puncture techniques.

375-34001  Baby Stap

Baby Hippy

Reproduction of the lower torso and limbs of a female newborn designed to train professionals in diagnosing both congenital hip dislocation and hip dislocatability.

375-35001  Baby Hippy

Consumables

- 300-00750  Simulated Blood – Red
- 375-34150  Replacement Tubing (Baby Stap)
- 375-32150  Replacement Skin & Artery (Baby Arti)
MAKING SIMULATION EASIER

Our main goal when building the latest generation of simulators was to develop systems so advanced that they’re actually easier to operate. Our simulation solutions are created with you in mind—balancing the most cutting-edge technology with simple set-up and easy-to-run scenario programs.

BUILT TO LAST

With 50 years of experience in medical educational products, Laerdal is a company you can trust. We pride ourselves on developing and building the highest-quality products — and offering excellent services that are tailored to the needs of our customers. Whether you’re looking for an advanced or basic simulator, scenarios developed specifically for turn-key implementation, or educational and technical services, Laerdal can provide exactly what you need.

HELPING YOU SUCCEED

Laerdal is dedicated to helping you meet—and exceed—your educational goals. From simulators and scenarios to installation and training, our products and services are designed to help you achieve the optimal training environment with the most realistic outcome possible.

Please visit our web-site for additional information regarding features, accessories and consumables.
SimMan 3G

The next generation of Laerdal Simulation

The new SimMan 3G patient simulator is so advanced, it’s actually easy to operate. Whether you’re programming a scenario, using a pre-programmed scenario, or using SimMan 3G on the fly, we’ve made a successful simulation experience as simple as possible.

**Easy to Use** - SimMan 3G’s intuitive software interface, with three flexible operating modes, allows novice and expert instructors to create effective simulations more quickly than ever before.

**Easy to Operate** - A revolutionary new way to manage a Laerdal patient simulator; Auto Mode is designed to be the most automatic way of operating SimMan 3G, making it even easier for users to run simulations. The SimMan 3G Auto Mode combines physiological models, pre-programmed patient cases, and an innovative method for managing model-based simulation. Instructors can take advantage of preprogrammed pharmacological responses for over 108 drugs, BUT without the complexity that often comes with physiological model based simulations. Repeatedly run the most complex cases with ease and tailor the difficulty to match the skills of every student.

**Easy to Teach** - Operating SimMan 3G “on the fly” using the new Instructor Mode, instructors who like to combine their knowledge, skills and direct control of the scenario to help students learn can now run the simulator much more easily as the simulation progresses. Exciting features of the Instructor Mode include easy access to the most important vital signs; an easy-to-learn and easy to use interface; and precise control of the scenario.

**Easy to Program** - SimMan 3G’s powerful scenario-editing capability, an integrated part of Instructor Mode, is built on the tried, tested, and proven SimMan software. It includes the same flow diagrams, trends, handlers, and events that have made it easy to write, run, and debrief a SimMan simulation. With SimMan 3G scenario writing and validation is easy to learn. And once a custom simulation is prepared, it behaves exactly as the instructor needs time after time—so every student can be taught in the same standardised way. The software can even include images, sounds, and multimedia graphics to further enhance the students’ learning experiences.
212-0050   SimMan 3G
212-090   Operator PC, Tablet PC 12", Pen touch
           (incl. docking station)
212-092   Patient Monitor, Tablet PC 12", Finger touch

Optional:
212-093xx   Patient Monitor Panel PC 17", w power cable
SimMan 3G

Real Environments, Real Results
SimMan 3G’s durable and rugged construction provides you with the flexibility to perform simulation-based education in the environment of your choice. Built with the quality you’ve come to expect from Laerdal, SimMan 3G was developed to be the most reliable patient simulator in the world—giving you the peace of mind to know that you can train where you practice medicine - in real environments with real results.

The “All Terrain” Solution
With SimMan 3G you can train in the actual environments in which your students will be working—such as in a hospital or ambulance or even in a military combat environment. Completely wireless, self-contained, rugged, and reliable, SimMan 3G boasts the proven quality and durability you’ve come to expect from Laerdal.

More than a Patient Simulator
SimMan 3G is much more than a patient simulator; it integrates fully with the complete learning circle of Laerdal products. With its video debriefing, patient monitoring, pre-packaged patient cases and scenarios, available Advanced Video System, and other accessories, SimMan 3G is a complete simulation offering to help provide a turn-key learning solution.
SimMan 3G includes:
- SimMan 3G Manikin
- SimMan 3G Software & License
- Operator’s Tablet PC
- Simulated Patient Monitor and Software
- Simulated Patient Cables
- Webcam
- Drug Recognition Kit
- Soft Sided Transportation Cases
- Specially Designed Clothing
- Sample Package 10 SimMan 3G Patient Cases for AutoMode
- 1 Year Manufacturer’s Warranty

Accessories:
- Simulated Patient Monitor & Software (Large screen, Panel PC, w/power cord)
- Hard Sided Transportation Case - Rugged and weatherproof
- Advanced Video System
- Wound Modules and Moulage Kits
- Tablet PC Accessory Kit (Monitor, Keyboard, Mouse)
- Portability Kit
- Compressor

Scenario Packages:
Please contact your Laerdal representative for information on Scenario Packages.

Eye Signs
Include pupillary responses to light, blinks at slow, normal and fast rates, winks and open, partially open and closed reactions.

Drug & Event Recognition
The new and advanced Drug Recognition System allows students to administer drugs simultaneously. It registers the amount, speed and type of drug automatically and applies the appropriate physiological responses saving the instructor time and improving the overall intelligent debrief.

Convulsions
Degrees of seizures and convulsions can be created from minor effect through to a full convulsion through the Instructor Mode.

3G

SimMan

The advanced simulator for training in emergencies

SimMan is a portable and advanced patient simulator for team training. SimMan has realistic anatomy and clinical functionality. SimMan provides simulation-based education to challenge and test students’ clinical and decision-making skills during realistic patient care scenarios. SimMan includes well-proven software and an interactive technologically advanced manikin allowing learners to practice the emergency treatment of patients.

SimMan software is easy to operate and allows you to build advanced scenarios, including Trends and Handlers, to meet your learning objectives. The software communicates with the manikin and registers events during the simulation. The user interface is designed to make it easy to control, adjust and manage the scenarios.

The software automatically generates a debriefing view combining event logs with synchronised recordings of the patient monitor and in-room video. Easy-to-use navigation tools and adjustable level of detail help the instructor to optimise the simulation as an educational tool.
SimMan comes with a simulated patient monitor.

The 17” colour LCD screen provides 12-lead ECGs, SpO₂, CO₂, Haemodynamic pressures (ABP, CVP, PAP, PCWP, NIBP), Cardiac Output, and several other parameters. Touch-screen operation allows for setting of waveform parameters, alarm functions, and screen layouts.

Media files illustrating lab results, x-ray and ultrasound, snapshot of 12-lead ECG and trends can also be shown on the patient monitor.

**211-00050**  SimMan

*SimMan Includes:* Manikin, BP cuff, SpO₂ probe, Air/CO₂ tube, Operating software, Directions for Use.

**210-09033**  Peripherals kit Complete

Includes: Simulated patient monitor, USB web-camera, USB hub, PDA as remote control, LinkBox and laptop.

Optional accessory:

- **210-01050**  Compressor 230-240 V
- **381220**  Regulator unit

### Consumables

- **300-00750**  Simulated Blood
- **250-21050**  Airway Lubricant 45 ml
- **381105**  Neck Skins (pkg. 6)
- **200-00250**  Cricothyroid Membrane Tape (1 Roll)
- **312029**  Replacement Skin & Vein System – Male

### Laerdal Services

**Technical Services**

- **1008407**  Installation Service
- **211-00050EXW**  Extended Warranty (1 yr)
- **211-00050PMB**  Basic Preventative Maintenance
- **211-17151**  SimMan Scenarios Undergraduate Nursing Vol 1
- **211-17145**  SimMan Scenarios Emergency Care (in hospital) Vol 1
- **211-17615**  SimMan Scenarios Postgraduate Nursing Vol 1

**Educational Services**

- **210-90150**  Introduction to SimMan On-Site
- **210-90550**  Scenario Programming for SimMan On-Site
- **210-90450**  Customised Instruction
- **210-91050**  Custom Scenario Development

**Contact your local Sales Company for details:**

See page 136 for the complete Services Catalogue.
SimMan Optional Features

Regulator Unit
A regulator unit will be needed if you choose to use an existing fixed air source for running the simulator. The regulator will connect to a wall air outlet or to standard compressed air and CO₂ containers available from local suppliers.

381220 Regulator Unit

Portability/Power Adapter Kit
Kit allows the simulator to be used indoors and outdoors during training scenarios.

Kit includes:
Battery pack – supplies power to the link box and adapter kit, Regulator unit – for portable compressed air and CO₂ canisters, Carrying case – can be attached to any standard gurney

381850 Portability/Power Adapter Kit

Nursing Wound Module Set
Nursing wounds can be added to the simulator for realism in wound assessment and care scenarios.
- Chest surgical incision with skin staples (lay-on)
- Abdominal packing and irrigation wound (lay-on)
- Abdominal surgical incision lay-ons, one with nylon sutures and penrose drain and one with staples and penrose drain
- Infected colostomy stoma
- Lacerated hand
- Forearm Suture Module
- Gluteal and ventro-gluteal pressure ulcer modules
- Thigh packing and irrigation wound
- Thigh suture module
- Thigh debridement module
- Below knee amputation
- Varicose vein leg with stasis ulcer
- Diabetic foot with gangrenous toes and heel decubitus ulcer

381450 Nursing Wound Module Set
211-20050 SimMan Nursing Wound Module Set (include pedal pulse)

Simulated Smallpox Module Set
Laerdal Simulated Smallpox Module Set offers the ability to identify the effects of abnormal and normal skin reactions to smallpox inoculation. The set also includes a blank deltoid pad for the practice of inoculation.

276-16001 Simulated Smallpox Module Set
Trauma Modules
Interchangeable trauma modules are available for added realism in emergency trauma management.

- 1st-, 2nd-, and 3rd-degree burns – sleeve for right arm
- Exposed viscera – abdominal lay-on
- Impaled object – thigh
- Open fracture – femur
- Closed fracture – right leg tibia and fibula
- Contused ankle and foot – left leg
- Crushed foot – right foot with exposed bone and soft tissue
- Amputation – small toe of right foot
- Projectile wounds – small and large caliber entry and exit wounds

381500 Trauma Modules

211-25050 SimMan Trauma Module Set (include pedal pulse)

Bleeding Trauma Modules
This set was designed to teach the rapid identification and effective management of bleeding control, per ATLS guidelines or military procedure, to prevent loss of life.

381550 Bleeding Trauma Modules
Bleeding Trauma Module Set Includes:
Appendages, Reservoirs with Tubing (4), Simulated Blood (4 bottles), and Carry Case.

The Forced Air Bleeding Control System adds the ability to simulate realistic bleeding and haemorrhage control scenarios to SimMan and other Laerdal training products.

210-00150 Forced Air Bleeding Control System
Forced Air Bleeding Control System Includes:
Appendages, 1 Pressure Tank, 3 Hoses, 1 Two-way Manifold, 6 Quick Disconnect Couplers and 6 Pull Ties.

210-00550 Forced Air Bleeding System Complete
Forced Air Bleeding System Complete Includes:
Bleeding Trauma Module Set and Forced Air Bleeding Control System.

Simulated NBC Module
With the increased global awareness of potential nuclear, biological, and chemical attacks, it is becoming increasingly important for clinicians, first responders, military personnel and educators to be able to recognise, diagnose, and treat the symptoms of such an attack.

Laerdal Simulated NBC Module offers the ability to replicate the effects of toxic agents by producing realistic, frothy, bodily fluids that emanate from the tear ducts, mouth, and nose.

276-15001 Simulated NBC Module
Simulated NBC Module Includes:
Face Cover, OD Green Ruck Sack, Liquid Soap Fluid Tank, Clear Fluid Tank, Manifold with Tubing, and 4 oz Bottle Liquid Soap.

www.laerdal.com
SimBaby

The advanced simulator for training in infant emergencies

SimBaby is the portable advanced infant patient simulator for team training. SimBaby has realistic anatomy and clinical functionality that enables simulation training. SimBaby includes software with video debriefing and an interactive technologically advanced manikin allowing learners to practice the emergency treatment of infant patients.

SimBaby has an anatomically realistic airway that allows accurate simulation of all relevant infant airway management and patient care situations. SimBaby can simulate a wide range of breathing patterns including variable rate and depth, and complications like subcostal retractions and see-saw breathing. Relevant circulation features, include palpable pulse on several locations, BP measurement, realistic IV and IO access.

SimBaby software is easy to operate and allows you to build advanced scenarios, including Trends and Handlers, to meet your learning objectives. The software communicates with the manikin and registers events during the simulation. The user interface is designed to make it easy to control, adjust and manage the scenarios.

The software automatically generates a debriefing view combining event logs with synchronised recordings of the patient monitor and in-room video. Easy-to-use navigation tools and adjustable level of detail help the instructor to optimise the simulation as an educational tool.
SimBaby comes with a simulated patient monitor.

The 17” colour LCD screen provides 12-lead ECGs, SpO₂, CO₂, Haemodynamic pressures (ABP, CVP, PAP, PCWP, NIBP), Cardiac Output, and several other parameters. Touch-screen operation allows for setting of waveform parameters, alarm functions, and screen layouts.

Media files illustrating lab results, X-ray and ultrasound, snapshot of 12-lead ECG and trends can also be shown on the patient monitor.

### 245-05050 SimBaby

**SimBaby includes:** Manikin, BP Cuff, SpO₂ probe, Air/CO₂ tube, Set of consumables, Operating software, Directions for Use

### 210-09033 Peripherals kit Complete

Includes: Simulated patient monitor, USB web-camera, USB hub, PDA as remote control, LinkBox and laptop

Advanced Video System

*Improving learning with high quality debriefing.*

Debriefing is a critical part of simulation based education, and this process can be enhanced with high quality video debriefing systems. To help educators, Laerdal introduces the Advanced Video System (AVS).

The AVS is a simple, effective debriefing system that enables SimMan 3G, SimMan, SimBaby and SimNewB users to easily capture simulation video, audio, data logs, and patient monitoring. It automatically integrates data from up to four video cameras, a microphone, and patient monitoring with the event log from any of Laerdal’s Advanced Patient Simulators, creating a debriefing file that is easy to review with students, manage, and share. The AVS can also be integrated into your simulation center’s Local Area Network, allowing simulations to be viewed throughout your facility.

These features, combined with the Advanced Video System’s simple operation and flexible user interface allow debriefing to become an easier and more effective part of your simulation based education.
Features and Benefits

• Capture the dynamics of your simulation by embedding audio and video streams with the synchronised data log and patient monitor on a single debrief file. Debriefing with AVS will accurately replay scenarios and show what occurred, as opposed to student perceptions of what occurred.

• The AVS simplifies the delivery and presentation of scenario debriefing by providing instructors with a tool to review all student assessments, therapies, patient interactions, critical thinking skills, and communication skills. Students will benefit from observing the impact of their actions or inactions.

• The time indexed playback feature of the AVS helps facilitate debriefing. Instructors can quickly and easily move to specific segments within a scenario where learning objectives need to be addressed.

• Reinforce learning objectives during debriefing by displaying comments added to the log during the scenario. Additionally, instructors can annotate these comments, as needed, during the debriefing process.

• The AVS allows instructors to easily manage the delivery, storage, and distribution of debriefing files. The files can be stored to a local hard disk, network server, or exported to a variety of portable media. Students can take debriefing files home for further reflection. Simulations can also be viewed within your facility by integrating AVS with your network.

• The AVS easily connects to video cameras that your facility chooses. Contact your local Laerdal representative for details.

210-08033  Advanced Video System - 230V

Please contact your Laerdal Sales Representative for more information on the AVS.
SimNewB

Introducing Laerdal's first Neonatal Simulator

SimNewB is an interactive simulator, designed by Laerdal in cooperation with the American Academy of Pediatrics to meet the training requirements of neonatal emergency medicine and resuscitation courses. With realistic newborn traits and lifelike clinical feedback, SimNewB is ideal for practising for the specific challenges of neonatal resuscitation training.

Realistic Anatomy: SimNewB represents a full term, newborn female. Measuring 53 cm and weighing 3 kgs, SimNewB can present as a limp, cyanotic newborn with no vital signs, or as a moving, crying, vigorous newborn.

Patent Umbilicus: An umbilicus with a life-like pulse can be catheterised for IV access.

Intraosseous Access: SimNewB features I/O access in both legs.

Realistic Airway and Breathing Functionality:
- for training in all aspects of newborn airway management, including the use of Positive-Pressure Airway devices, and the placement of ET tubes and LMA.
- Lung compliance: Instructors can alter the simulator's lung compliance to challenge providers' skills in detecting and treating lung compliance changes.
- Realistic chest rise: The chest rise on the simulator can be adapted to be absent or normal, with breathing rates up to 100 breaths per minute.
- Needle decompression: The torso of SimNewB includes functionality to relieve a pneumothorax via needle decompression.

Ease of Use:
Designed to be easily integrated into all neonatal clinical training curriculums. An innovative user interface and scenario design allow instructors to control the Simulator's responses throughout a training session with the push of a button on the remote hand held controller. Features 6 preset patient levels ranging from a vigorous to a compromised newborn.
Treating compromised newborns demands the best training

ADVANCED ONLY

Software Features:
- Easy-to-operate software based on well proven SimMan/SimBaby software
- Manual control over all parameters
- Scenarios, with Trends and Handlers, can be preprogrammed by the user

Debriefing Viewer:
- Web-camera recording
- Review event log together with synchronised recording of the patient monitor and in-room video
- Stand alone debrief viewer for offsite review

Simulated Patient Monitor:
- Highly configurable
- Simulate several parameters including:
  - Heart Rate - ECG - SPO2 - NIBP - ETCO2
  - Respiratory Rate
  - Multi-level alarm
  - Touch Screen Operation

225-05015* SimNewB:

Product Includes: PC Enabled Manikin, NRP Simulation Support Materials, SimNewB Control Unit with Remote Control, Compressor, AirCO2 Hose, Operating Software and Directions for Use.

225-09033 SimNewB Advanced Upgrade Kit
Kit Includes: Laptop PC, Touch Screen Monitor, USB Web-camera and advanced software.

* Includes Two Scenario packages, the Australian Package (developed in Australia by Key Educational Organisations) and a package developed by the American Academy of Paediatrics.

ALS Simulator

The simulator for advanced life support training programs

The Advanced Life Support Simulator is a realistic interactive training manikin for simulating a wide range of advanced life saving skills in pre-hospital emergencies. The simulator responds to clinical intervention, instructor control, and comprehensive pre-programmed scenarios for effective practice of diagnosis and treatment of a patient. The Advanced Life Support Simulator is the fully functional pre-hospital simulator, with spontaneous breathing, airway control, voice, sounds, ECG, and many other clinical features.

Resusci Anne Simulator

The wireless simulator for quality CPR training

The Resusci Anne Simulator provides the key simulation functionalities including a high-quality airway, spontaneous breathing, ECG, live defibrillation, IV, blood pressure, voice, lung sounds and heart sounds for basic simulation training.

150-00001 Resusci Anne Simulator

Resusci Anne Simulator Includes:
Airway Head, BP Arm with Cuff, IV Arm, Extrication Legs, Remote Control, Educational Support Material, Software CD and USB Interface Cable, Air Pump, AC Power Cable, Full-Body Soft Case and Directions for Use.

Resusci Anne Simulator Optional Accessories

Leg Assembly with Wounds 381655 Transportation Case

Educational Efficiency through Self Directed Learning (SDL)

We understand the value of providing flexible learning solutions that offer students a convenient way to move at their own pace, and on their own time, to achieve their educational goals effectively and efficiently. SDL instructional design guides learners through a complete course of study, progressively improving their skills and knowledge which ultimately helps build rescuer competence. Whether your focus is first-time learning of CPR, retraining and certification of CPR skills, or even more complex medical education needs, these innovative learning solutions may help you reach your educational goals more efficiently.

Our commitment to Educational Efficiency at Laerdal is to ensure that our innovative Self Directed Learning programs are carefully designed to provide the highest level of educational quality, clinical accuracy and cost efficient delivery methods necessary to meet the educational goals of both medical and lay providers around the world.

Mini Baby

Train the whole family and increase the chance of survival for an infant

This innovative self-directed Infant CPR learning kit is a simple, “practice-while-watching” format that an entire family can use to learn how to respond during the first few minutes of an infant emergency.

Mini Baby Infant CPR Personal Skills Learning Program benefits you and your community.

- Allows anyone who cares for infants to learn the core skills of infant CPR and relief of choking in 30 minutes or less.
- Flexibility allows this program to be used anywhere and at a pace that is convenient to their own individual learning style
- Interactive hands-on 30 minute "practice-while-watching" instructional DVD that teaches effective infant CPR skills
- "Multiplier effect" creating more potential lifesavers
- Incorporates research-supported "practice-while-watching" educational methodology for learning the core skills of infant CPR
Each kit contains:

- A personal, inflatable infant CPR Manikin (Mini Baby)
- Infant CPR Skills “practice-while-watching” instructional DVD
- Replacement Airways
- Manikin Wipes

(US Mini Baby version pictured)

Learn more

All of these self directed learning CPR programs are developed in cooperation with educational partners in various countries around the world. For more information on how you can help to develop a localised educational program using Mini Anne or Mini Baby, please contact your nearest Laerdal representative (See page 146).
Resusci Anne Skills Station

A paradigm shift in CPR Training and Certification

The Resusci Anne Skills Station provides self-directed Basic Life Support CPR skills training and certification, with the research-proven benefits of voice feedback during training. Through the use of the Laerdal Competence Management System (CMS) it adds the possibility of efficiently managing larger groups of trainees. CMS can also integrate e-mail systems to automate the process of booking, reminding trainees of their training sessions, and providing training certificates.

Log on to PC in Resusci Anne Skills Station room and view introductory video

Practice CPR with objective measurement and voice feedback

After training and passing the test you can print out, or send by e-mail, a localised certificate.

The Quality Circle (see pages 92-93)

For more information visit our website www.laerdal.com.au or www.laerdal.co.nz and look under "skills trainers"
Ordering information:

454-10033: Resusci Anne Skills Station
Includes all necessary software, cable for connecting the manikin to a PC and 200 user licenses.

Please note:
1. Manikins are not included in the product and must be ordered separately
2. A PC is not included in the product and must be sourced by the customer

454-11050: 100 user licenses
(multiply to the number needed)

Manikins to be used with RA Skills Station:
31005640: Resusci Anne SkillReporter (manikin)
453-35050: Skills Station Baby (manikin)

HeartStart FR3 Defibrillator

First of its kind, 3-in-1 design
Introducing the FR3 defibrillator, tailored for EMS, with exciting new features combined with proven AED technology.

1. Deliver fast, effective therapy
2. Help ensure high quality CPR
3. Manage data, configure, and upgrade with extensive flexibility.

Available early 2009

See page 98 for more information
New to Laerdal

Laerdal Compact Suction Unit 3 (300 ml)

*LC*SU3 is always ready to assist you in providing effective suctioning to a patient because its small size and shape enables you to carry it to every call in your airway bag.

Its unique 300ml canister system coupled with a variable vacuum regulator, with an LED display gives you the power and control you need to quickly clear a blocked airway.

Available Late 2008

See page 122 for more information
MicroSim

Self directed computer based patient simulation

MicroSim is a computer-based self-directed learning system for Healthcare providers. The software contains modules with over 40 patient scenarios based on specific learning objectives. Each patient scenario challenges the student’s medical knowledge and problem-solving ability while strengthening their critical thinking skills. Developed in cooperation with leading medical authorities, MicroSim is designed to be used for initial and continuing education.

MicroSim Curriculum Package

Self-directed learning and computer-based simulation for your entire institution

Educational and Economic Benefits

**Improves training effectiveness**
- Standardises training methodology
- Integrates simulation scenarios with curriculum
- Standardises outcome measurements
- Documents performance and improvement

**Multi-level application**
- Initial education
- Continuing education
- Beginner to Advanced level scenarios
- Inhospital, Prehospital, and Military

**Cost management**
- Convenient and flexible self-directed learning mode can be used outside the classroom
- Increases efficiency of instructor time
- Increases effectiveness of classroom time

MicroSim

Easy-to-Use Powerful User Interface

Allows intuitive access to:
- More than 100 different investigations and treatments
- More than 100 different types of drugs
- Different defibrillators (both manual and AEDs)
- All common airway, breathing, and circulation techniques

Realistic Patient Scenarios

All the scenarios come with specific learning objectives in patient care and emergency medicine. The scenarios are grouped in modules of 5 patients each. For more information about available modules, please contact your local Laerdal representative.

Automated Intelligent Debriefing

The debriefing after a simulation session facilitates the learner’s monitoring of the learning process and stimulates engagement in developing decision-making skills. Through this, the learner is helped to understand what happened and how to improve performance.

Highly Configurable System

Laerdal MicroSim is learner centered and can be extensively customised to fit the learner’s training needs through the configuration screen. The course designer can customise the selection of investigations, interventions, and drugs available during simulation to reflect the professional level and experience of the learner.

MicroSim Personal Access

A personal version of MicroSim for your individual learning needs

The MicroSim Personal Access program is tailored to the individual user and includes the same 8 modules and 40 patient cases as found in the complete MicroSim Curriculum Package. Educators who are interested in having their students use these individually-packaged programs are able to track their student’s progress through each patient case and module using the optional CMS Web Hotel Package.

Software and License Package

451-59515 MicroSim Inhospital Personal Access
452-59515 Prehospital Personal Access

Includes software CD and pre-paid license

Competence Management System (Web-based)

459-11015 CMS Web Hotel Package

Allows the educator to configure the equipment and skills students are allowed to use as they progress through their education. Student’s progress can easily be monitored and tracked as they navigate through and complete each patient case and module.

Guidelines recommendations increase survival

Survival rates from sudden cardiac arrests (SCA) have remained virtually unchanged for the last 25 years. However, recent reports from EMS systems in Wisconsin, Seattle, Kansas City and Arizona in the USA are reporting significant increase in survival rates.

The likely contributors to these encouraging improvement is the renewed focus on delivering more and better quality CPR, as recommended by the latest Guidelines:

“Push hard, push fast, allow full chest recoil after each compression, and minimise interruptions in chest compressions.” (AHA Guidelines 2005)

Victims of cardiac arrest need immediate CPR. This provides a small but critical blood flow to the heart and brain. It also increases the likelihood that a defibrillatory shock will terminate VF and enable the heart to resume an effective rhythm and effective systemic perfusion. Chest compression is especially important if a shock cannot be delivered sooner than 4 or 5 min after collapse. (ERC Guidelines 2005)

* Atwood et al, “Post-discharge survival following pre-hospital cardiopulmonary arrest owing to cardiac aetiology”, Resuscitation (2005), 67 (1), 75-80

References:
- Garza et al, “Improvement in survival to discharge of cardiac arrest patients using novel out of hospital treatment protocol”, American Heart Association - Scientific Sessions 2007, Abstract Presentation
Helping you succeed with quality implementation

Lifesaving CPR is dependent on a strong focus of each of the three factors in the Quality Circle:

- Real-time refresher training, preventing CPR skills decay.
- Tailored CPR to individual patient needs. Tomlinson et al (2006), highlighted that patients have very different depth-force relationships. 91 patients varied from approximately 10 kg force to 55 kg force for compressing down to the recommended Guidelines depth of 4 cm.

HeartStart MRx with Q-CPR technology

The right tool for EMS

HeartStart MRx with Q-CPR provides professional emergency responders with a unique monitoring, feedback and defibrillation technology; thereby ensuring Resuscitation is performed in accordance with local quality guidelines. The self-explanatory interface allows for rapid evaluation and immediate rescuer intervention.

Options:
- Q-CPR – CPR monitoring and feedback technology
- Paddles (adult and paediatric combined)
- 12-lead ECG with interpretation
- 12-lead Data transmission
- Pacing
- SPO₂ - Pulse Oximetry
- NIBP - Non-Invasive Blood Pressure
- ETCO₂ - Capnography
- 75mm Printer
- Wireless data transmission of 12-lead
- Data management solutions
- Temperature
- IBP - Invasive Blood pressure

M3536A
Full featured HeartStart MRx with Q-CPR

The Quality Circle (see pages 92-93)
The HeartStart MRx is...

**Feature packed and light weight**
Superior monitoring parameters, proven therapies, rugged, reliable and ready for use at 6.3Kg

**The best pre-hospital monitor/defibrillator**
Large 8.4" colour TFT screen that can present all parameters simultaneously. Bright backlit display that is clearly visible from any angle even in difficult light conditions.

**Built for both a sprint and a marathon**
Charges to 150 Joule in approximately 3 seconds 5 hours operation time, with all monitoring parameters running, on one battery. 10 hours operation time with two batteries installed.

The Importance of Early Defibrillation

Every Minute Counts—It is a proven concept that the only effective treatment for ventricular fibrillation (VF) is prompt defibrillation. Yet, defibrillation is significantly more effective when it is administered within the first few minutes of a Sudden Cardiac Arrest (SCA) episode.

Reference:
1. AHA 2000 Guidelines
The Importance of Early Defibrillation

Chance of Survival

A study published in an October 2000 issue of the New England Journal of Medicine suggests that survival rates are highest when defibrillation is delivered within three minutes of the time of collapse.

This study is further supported up by a study of incidents at the MCG (Melbourne Cricket Ground, Victoria) and Shrine of Remembrance that showed that:

"out of 28 victims of sudden cardiac arrest 86% left the venue alive",¹ having been treated at the scene with a Laerdal HeartStart defibrillator. Compare this to the average survival rate in Australia of around 3%.²

Location is Key

It is firmly anticipated that by increasing defibrillator availability and placing them in well planned locations that response times will improve. Defibrillators have the potential to assume a role similar to that of the fire extinguisher - omnipresent and ready in case of emergency.

HeartStart FR3
First of its kind, 3-in-1 design

New product, tailored for EMS, with exciting new features combined with proven AED technology.

1 Deliver fast, effective therapy
   - **Fast Therapy.** With automatic turn on when case is opened, and pre-connected SMART Pads III without foil pouch, the patient can be connected and therapy can be delivered with record speed.
   - **SMART CPR** evaluates the patient’s heart rhythm and advises whether to initially treat shockable rhythms with a shock, or with CPR immediately followed by a shock.
   - **Quick Shock.** Survival is closely linked to the speed of shock delivery after CPR. HeartStart FR3 can deliver a shock in less than 8 seconds.

2 Help ensure high quality CPR
   CPR meter offers CPR feedback and guidance on protocol, to help improve CPR quality

3 Manage data, configure, and upgrade with extensive flexibility.
   Bluetooth data transmission makes retrieval of episode data, device configuration and clock synchronisation simple and effective.

HeartStart FRx

For those who get there first

The HeartStart FRx is an easy to use, rugged and reliable AED for those who get there first. It combines proven technology with ease of use, ruggedness and preparedness.

Easy to use

The HeartStart FRx has the same ease of use as the HeartStart First Aid, with clear voice instructions for operation and CPR.

Rugged

The HeartStart FRx defibrillator is exceptionally rugged. It is designed to work and be stored in harsh environments such as sea vessels, industrial areas and vehicles.

Preconnected Smart II Pads
One size for all patients, adults and children. Pads included in self test.

CPR coaching available at the push of a button “I”.

Ready - virtually maintenance free.

HeartStart FRx has a long-life battery: 4 years in standby. Daily self-tests check pads, battery and the electrical components.

Green “Ready” light means the HeartStart is ready for use.

A warning beep will sound when battery or pads need to be replaced or if the unit needs service.

Reliable and Fast.

HeartStart FRx includes proven Philips technologies for heart rhythm assessment (SMART Analysis) and defibrillation energy delivery (SMART Biphasic).

With patented Quick Shock, HeartStart defibrillators are the fastest in their class at delivering a shock after CPR.
HeartStart FRx Ordering Information

HeartStart First Aid Defibrillator

Now everyone can help save a life

HeartStart First Aid is an affordable first aid defibrillator intended to be placed wherever it may take more than five minutes for an ambulance to arrive.

With the HeartStart First Aid defibrillator anybody can help save a life with minimal training.

Always ready - virtually maintenance free.

HeartStart First Aid has a long-life battery:
4 years in standby.

Daily self-tests check pads, battery and the electrical components.

Green “Ready” light means the HeartStart is ready for use.

A warning beep will sound when battery or pads need to be replaced or the unit needs other service.

Easy to use

A defibrillator so simple to operate that a responder with minimal training can save the life of a co-worker; friend or member of the public.

The HeartStart First Aid guides the user through each step of defibrillation, including CPR Coaching.

Integrated SMART Pads placed on the victim’s bare skin ensure that the defibrillator adapts to the user’s actions every step of the way.

Safe, effective and fast

HeartStart First Aid includes proven Philips technologies for heart rhythm assessment (SMART Analysis) and defibrillation energy delivery (SMART Biphasic).

Like all HeartStart Defibrillators, the First Aid can be used to treat infants and children as well as adults.

Survival is closely linked to the speed of shock delivery after CPR

With patented Quick Shock, HeartStart defibrillators are the fastest in their class at delivering a shock after CPR.
HeartStart First Aid Ordering Information

M5066AABU  HeartStart Defibrillator First Aid
  Includes: Defibrillator, 1 Battery Pack, Electrodes (1 pair) and slimline carry case

M5070A  Battery for HeartStart First Aid and FRx
  Lithium manganese dioxide battery, 9VDC 4.2 Ah
  Capacity: Minimum 200 shocks or 4 hours of operating time.
  Minimum 10 hours of use in training mode
  Shelf life: Minimum of 5 years (prior to insertion).
  Stand by life: Typical 4 years (after insertion).

M5071A  Adult SMART Pads Cartridge
M5072A  Infant/Child SMART Pads Cartridge
M5073A  Adult Training Pads Cartridge
M5074A  Infant/Child Training Pads Cartridge

M5076A  Carry Case First Aid Slim type
YC  Carry Case for First Aid and FRx
  Waterproof hard plastic

- **M3864A** Training & Administrative Pack M3855A Charger for Training & Admin. Pack
Brackets and cabinets for HeartStart AEDS

941343 HeartStart Wall Box with alarm
Has room for a HeartStart AED with or without carry case. Battery operated alarm with sound and light when door is opened. Material: Plastic. Size: 48 x 37 x 17 cm

9898 031 36531 Basic AED Cabinet
Has room for a HeartStart AED with or without carry case. Battery operated alarm with sound when door is opened. Material: Steel. Size: 42 x 38 x 15,5 cm

PFE7024D Premium AED Cabinet
Has room for a HeartStart AED with or without carry case and additional medical supplies such as oxygen. Battery operated alarm with sound and light when door is opened. Material: Steel. Size: 41 x 57 x 15,5 cm

941314 Bracket for AED
Intended to house a HeartStart AED in its carry case. Possibility to install pad-lock. Material: Steel. Size: 25 x 29 x 13,5 cm

M3857A Wall Mount Bracket
Intended to house a HeartStart AED in its carry case. The defibrillator’s carry case can be tethered to the Wall Mount Bracket with a breakaway Secure-Pull Seal (M3859A), to discourage tampering. Material: Steel. Size: 27 x 20,5 x 12,6 cm

M3859A Secure Pull Seal for Wall Mount 10 pack
M3858A AED Wall Sign
HeartStart Event Review

M3834A Single user license
9898 031 41811 Site license

HeartStart Event Review is an application for electronically managing the case data recorded by the defibrillator. It allows you to add case details by adding notes and completing basic data entry screens.

- Download ECG data from card or IR port
- Save episode to a database
- Save episode to file
- View and print the ECG and Event log
- E-mail it to a central data manager or medical director
- Erase data card or defibrillator’s internal memory
- Device Configuration First Aid and FRx via IR
- Self-Test Reports FR2, First Aid, FRx

Supports HeartStart FR, 4000, XL, FR2, First Aid, FRx and MRx

Available in English, French, German, Spanish, Italian, and Japanese.

Event Review Pro

861431 Single license
861431-A03 Site-wide license

Same as Event Review with the addition of the following features:

- Additional incident/patient/responder detail fields
- Show all waveforms from HeartStart MRx, including CO2, IBP and CPR waveforms
- Show Q-CPR waveforms and generate Q-CPR statistics for HeartStart MRx and HeartStart FR3.
- Utstein style reporting.
- View and print MRx 12 lead reports
- Network to central database

Supports HeartStart FR, 4000, XL, FR2, HSl, FRx and MRx

Available in English, French, German, Spanish, Italian, and Japanese.
HeartStart Defibrillators

HeartStart Review Express
Free download from www.philips.com
- Download ECG data from card or IR port
- View and print the ECG
- Erase data card or defibrillator's internal memory
If you need additional capabilities consider purchasing HeartStart Event Review.
Supports HeartStart FR, 4000, XL, FR2, First Aid, FRx. Not MRx
Available in English only.

HeartStart Configure
9898 031 43041 single license.
HeartStart Configure allows review and change of the configuration of HeartStart FRx and First Aid defibrillators using a PAD, palmOne™ or Windows Mobile. Supports HeartStart First Aid and FRx
Available in English, French, German, Spanish, Italian, and Japanese.

HeartStart 12 Lead Transfer Station 9898 031 42521 Single license
HeartStart 12-Lead Transfer Station software, installed on an Internet-connected server, allows you to forward a 12-lead ECG report taken in the field from your HeartStart MRx monitor/defibrillator to the receiving hospital.
- Forward a 12-lead ECG to any hospital or EMS control office you choose.
- Automatically or manually send 12-lead reports to one or more printers or fax machines and TraceMaster ECG Management System.
- Display the 12-lead report on a computer display and archive it in a database.
- Forward an ECG from one HeartStart 12-lead Transfer Station to another.

Q-CPR Review
Free download from www.laerdal.com
Software for reviewing the CPR data from HeartStart MRx
- View and print compressions, ventilations, CO2 and ECG waveforms.
- View research waveforms (acceleration, force and impedance).
- Add annotations
- Replay MRx audio
- Generate CPR statistics

The Quality Circle (see pages 92-93)

* Only Little Anne and Resusci Anne can be used with internal adapters M5088A

- AED Little Anne
- AED Resusci Anne
Laerdal AED Trainer 2

Realistic, advanced and affordable AED trainer which simulates the HeartStart FR2 AED in appearance, operation and voice prompts.

The Laerdal AED Trainer 2 offers an affordable alternative for educating the layperson and healthcare provider in the effective use of an automatic external defibrillator. This trainer was also developed to specifically simulate the HeartStart FR2 defibrillator.

Used together with AED Little Anne or AED Resusci Anne (see pages 16 & 19) the AED Trainer 2 with Laerdal’s Link technology offers unique realism and response to pad placement.

The trainer has 10 easily selectable Guidelines 2005 compatible scenarios, which can be overridden and adjusted from the optional remote control.

Latest software version and computer software for configuration and custom scenarios are available as free downloads from www.laerdal.com.

The trainer uses 6 C-size alkaline batteries, included.

94005033 Laerdal AED Trainer 2

Laerdal AED Trainer 2 Includes:

- Trainer, Carry Case, 6 Batteries, and Standard Adult Training Pads.

945050 Remote Control

945055 Programming Kit

Contains programming cable (RS-232 serial cable) plus CD with latest software in all languages, Configuration and Scenario Builder software. The software on the CD is also available as free download from www.laerdal.com.

07-10900 Standard Adult Training Pads

M3871A Standard Paediatric Training Pads

945090 Laerdal LINK Training Pads

These pads are for use with AED Little Anne or AED Resusci Anne.

945030 Carry Case AED Trainer 2

Laerdal LINK Training Manikins AED Little Anne or AED Resusci Anne. See pages 16 and 19.
HeartStart FRx Trainer

A realistic training partner to the HeartStart FRx

The HeartStart FRx Trainer simulates how the HeartStart FRx will operate during a real-life sudden cardiac arrest event.

Clear, confident voice instructions provide easy-to-follow directions, including CPR instructions, identical to the ones given by the real HeartStart FRx AED.

Eight easily selectable Guidelines 2005 compatible scenarios provides versatile and realistic training.

Multiple use training pads gives realistic feedback when used on a manikin with either internal or external manikin adapters. The same training pads can be used with the HeartStart FRx AED. Use Infant/Child key to activate Infant/Child mode.

The trainer is powered by 4 AA-size batteries (not included).

HeartStart FRx Trainer Includes:
Trainer, Training Pads II, 1 External Manikin Adapter strip, Carry Case and Instructions for Use.

Consumables

989803139271 Heartstart Training Pads II (containing one set of Training Pads II in training pads case)

989803139291 Replacement Training Pads II (pair of training pads on disposable liner for use in training pads case)

989803139311 Infant/Child Key

M5089A External Manikin Adapter, 5 pack

M5088A Internal manikin adapters.
Self adhesive patches to be placed on the inside of a Little Anne or Resusci Anne manikin skin.

942510 Carry Case
HeartStart Trainer

An affordable, safe and effective tool for AED training.

The HeartStart Trainer simulates how the HeartStart First Aid will operate during a real-life sudden cardiac arrest event.

Clear, confident voice instructions provide easy-to-follow directions, including CPR instructions, identical to the ones given by the real First Aid AED.

Eight easily selectable Guidelines 2005 compatible scenarios provides versatile and realistic training.

Multiple use adult or child training pads gives realistic feedback when used on a manikin with either internal or external manikin adapters. The same training pads can be used with the HeartStart First Aid AED.

The trainer is powered by 4 AA-size batteries (not included).

M5086A Heartstart Trainer with Carry Case

HeartStart Trainer includes:
Trainer, Adult Training Pads, 1 External Manikin Adapter strip, Carry Case and Instruction for Use.

Consumables

M5073A Adult training pads cartridge
M5074A Infant/child training pads cartridge
M5093A Replacement adult training pads
M5094A Replacement infant/child training pads
M5089A External manikin adapters 5 pack
M5088A Internal manikin adapters.
Self adhesive patches to be placed on the inside of a Little Anne or Resusci Anne manikin skin.

942500 Carry Case
Laerdal Pocket Mask

The Laerdal Pocket Mask is the most widely used CPR mask in the world

The Laerdal Pocket Mask incorporates a one-way valve and 3M™ Filtrete™ filter allowing for effective ventilation and outstanding user protection. While there may be look-a-likes on the market, there is only one real Laerdal Pocket Mask.

**Standard Versions**

- 82001133 Laerdal Pocket Mask w/Gloves & Wipe in Yellow Hard Case (each)
- 82004033 Laerdal Pocket Mask w/Gloves & Wipe in Blue Soft Pack (each)
- 82004133 Laerdal Pocket Mask w/Gloves & Wipe in Black Soft Pack (each)
- 82004233 Laerdal Pocket Mask w/Gloves & Wipe in Camouflage Soft Pack (each)
- 82001933 Laerdal Pocket Mask w/o Gloves & Wipe in Yellow Hard Case (each)
- 82000633 Laerdal Pocket Mask in Re-sealable Poly Bag (each)

**Oxygen Versions**

- 83001133 Laerdal Pocket Mask w/Oxygen Inlet & Head Strap w/Gloves & Wipe in Yellow Hard Case (each)
- 83004033 Laerdal Pocket Mask w/Oxygen Inlet & Head Strap w/Gloves & Wipe in Blue Soft Pack (each)
- 83004133 Laerdal Pocket Mask w/Oxygen Inlet & Head Strap w/Gloves & Wipe in Black Soft Pack (each)
- 83001633 Laerdal Pocket Mask w/Oxygen Inlet & Head Strap in Re-sealable Poly Bag (each)

**Consumables**

- 820610 Filter (each)
- 820410 One-Way Valve (each)
- 820700 Update Pack (1 filter, 1 valve)
- 830110 Head Strap, Adjustable (pkg. 10)
Laerdal Paediatric Pocket Mask

The most widely used CPR mask in the world is now designed with infants and children in mind.

Utilising the same low-resistance one-way valve as the traditional Laerdal Pocket Mask in combination with a transparent soft silicone mask, the Laerdal Paediatric Pocket Mask is an excellent companion for the professional rescuer and first responder who have contact with infants and children.

- 820050 Laerdal Paediatric Pocket Mask w/Gloves and Wipe in Blue/Yellow Soft Pack
- 820051 Laerdal Paediatric Pocket Mask w/Gloves in Blue/Yellow Soft Pack
- 820052 Laerdal Paediatric Pocket Mask w/Gloves in Red/Black Soft Pack

Consumables
820410 One-Way Valve (each)

Note: Wipes and gloves are expiration dated for user protection.

Laerdal Face Shield

The Laerdal Face Shield is small in size and price, but BIG in protection! Its hydrophobic filter gives the user and the victim effective protection. This single-use CPR barrier is available in convenient foil envelopes or sealed key ring. Private labeling available!

- 46000015 Laerdal Face Shield CPR Barrier (pkg. 50)

The Laerdal Face Shield with filter, in a convenient wallet-size package.

Laerdal Face Shield Key Ring

Small on size and value...big on protection!

Key Ring clips on belt loop or handbag, and fits in pocket.

- 460008 Laerdal Face Shield CPR Barrier Key Ring (pkg. 25), yellow
- 460009 Laerdal Face Shield CPR Barrier Key Ring in Multiple Colours – 8 Blue, 8 Black, 9 Red (pkg. 25)
- 460014 Laerdal Face Shield CPR Barrier Refill (pkg. 50)
- 460016 Laerdal Face Shield CPR Barrier Key Ring (pkg. 25), blue
- 460017 Laerdal Face Shield CPR Barrier Key Ring (pkg. 25), camouflage

Private label option. See page 116
CPR Barrier Product Private Labeling

An ideal solution for your organisation’s next fundraising campaign, event giveaway, or employee gift

Laerdal Suction Unit

The award-winning Laerdal Suction Unit is the ultimate in high performance. It’s rugged enough to take anywhere – in the ambulance or the hospital. Unique one-touch testing, built-in charger, and 5-year warranty validate its claim to fame as the one to beat.

Raising the standard for EMS suction units, in-hospital and postcare units, the LSU features industry-first device diagnostics, a “No Tools” replaceable battery, built-in charger, and an integrated vacuum regulation/power control. All this in a rugged “bump-proof/splash-proof” design that is very quiet.

The unit has been tested to meet IP34D classification, allowing it to be used in the rain without risk of failure.

5-YEAR LIMITED WARRANTY*

*Excludes battery, canister system, power cords and normal wear and tear.

78000033 LSU w/Reusable Canister
78001033 LSU w/Abbott Receptal® Canister

The Laerdal Suction Unit includes: Suction Unit, AC and DC Cords, Canister with Patient Tubing, Battery, Vacuum Tubing, Filter/liner with filter, and Directions for Use.

Laerdal Compact Suction Unit 3 (300 ml)

LCSU3 is always ready to assist you in providing effective suctioning to a patient because its small size and shape enables you to carry it to every call in your airway bag.

Its unique 300ml canister system coupled with a variable vacuum regulator, with an LED display gives you the power and control you need to quickly clear a blocked airway.

An AC/DC enabled, field changeable, NiMH battery pack also gives you enough power to get the job done.

So when you need effective suction, there’s now no need to run back out to the rig for your primary suction unit.

88006033 LCSU 3 - 300 ML

All Laerdal Compact Suction units include: 300ml Disposable canister Complete Package, with an HEPA Integrated Bacterial Filter; LED Control Panel and variable vacuum regulator; Internal Battery; AC to DC Adapter/Charger; AC power Cord and Directions for Use.

Consumables

886000 300 ml Disposable Collection Canister (Case of 10)
Accessories for LCSU3 - 300ml

- 88006005  Carry Bag w/Strap
- 88007004  External Battery Charger
- 88007005  High Capacity Rechargeable Battery 12V DC Ni-MH
- 88007006  Tethered Plug
- 88007007  Replacement Battery Door
- 884400   AC to DC Adapter/Charger
- 884401   120VAC Line Cord for USA
- 884402   Hospital Grade Line Cord (120VAC)
- 884403   Line Cord for UK
- 884404   Line Cord for EU
- 884500   12V DC Power Cord
- 885000   Vacuum Gauge Test Fixture

Thomas Tube Holder

Never worry about tape fastening again! The Thomas Tube Holder is the only tube holder with a quick-set screw for a secure hold after tube placement. Not only does the Thomas Tube Holder accommodate Combitubes and LMA’s, its special bite block feature protects the patient and the tube. No wonder it’s one of the most effective tube holders on the market today!

**Hook and loop padded strap** provides security and comfort. Will not stretch or shrink when wet. Colour-coded for ease of identification between adult and paediatric Thomas Tube Holder versions.

**Quick-set screw system** securely holds tubes in place and facilitates fast, easy adjustment or removal of the Thomas Tube Holder.

**Larger access opening** to allow for ease of suctioning and visual inspection of mouth.

**Larger opening** allows for application of a wide-range of single and double-lumen airway tubes. Ventilations may continue during application, adjustment and removal of the Thomas Tube Holder.

**Slide stick** facilitates fast, efficient application of the head strap around the patient’s neck without movement of the head.

Available Now

Treating compromised newborns demands the easiest to use, highest quality training solution.

SimNewB™

With realistic newborn traits and lifelike clinical feedback, SimNewB is ideal for training the specific needs of neonates.

SimNewB accurately represents a full term, 50th percentile newborn female with state-of-the-art simulator features. Available in basic and advanced versions, SimNewB was designed to be easily integrated into all neonatal clinical training curriculums.

Features include:
• Realistic Airway and Breathing Functionality
• An umbilicus with a life-like pulse that can be assessed, cut and catheterised for IV access
• I/O access in both legs
• Simulation Support Materials; 20 Neonatal Resuscitation Scenarios

V-VAC Manual Suction Unit

Get a good grip on handling even the toughest suction scenario with Laerdal’s V-VAC Manual Suction Unit. Ideal for First Responder emergency kits and as back-up suction. One-handed operation, one-piece disposable cartridge, and unique no-clog suction tip make the V-VAC the manual suction unit of choice!

985000  V-VAC Starter Kit
985100  V-VAC Training Kit

V-VAC Training Kit for Practical Use Includes:
Handle, Training Cartridge with plug for emptying and cleaning, Catheter w/Adapter Tip, Double Male Connector, and Directions for Use.

V-VAC Starter Kit for Patient Use (shown above)
Includes: Handle, 2 Replacement Cartridges, Short Suction Catheter w/Adapter Tip, Double Male Connector, and Directions for Use.

Consumables

A The V-VAC unit fits easily into many emergency kits. A separate carry bag is also available.
B The soft tip of the intake valve has deep cutouts to help prevent tube occlusion, and also soft tissue injury, when the tip is held against the back of the throat. The tri-cut valve resists back flow of suctioned matter.
Stifneck Select Extrication Collar

Savvy providers select quality with the Select. It’s simple symmetrical sizing, plus safety!

All the adult Stifnecks in one easily adjustable, fully assembled collar! Just measure the patient, select the size, immobilisation you expect from Stifneck collars.

980010  Stifneck Select Collar
980012  Stifneck Select Collar, Green
980016  Stifneck Select/HeadBed II HID Combo Pack
          (1 of each)

Stifneck Pedi-Select Extrication Collar

The Stifneck family of collars is now complete with the addition of the Pedi-Select!

Designed to meet the specific anatomical features of children.

980020  Stifneck Pedi-Select Collar

Three paediatric collars in one!

All Laerdal extrication collars are latex-free.
Stifneck Extrication Collar

The classic collar against which all others are measured

The original Stifneck with outstanding motion restriction and optimal sizing. Others may look like the Stifneck collar, but there’s only one original. The only collar that gets rave peer reviews!

Stifneck Extrication Collars

A 980600 Stifneck Tall Collar (Adult)
B 980500 Stifneck Regular Collar (Adult)
C 980400 Stifneck Short Collar (Adult)
D 980300 Stifneck No-Neck Collar (Adult)
E 980200 Stifneck Paediatric Collar
F 980100 Stifneck Baby No-Neck Collar

Stifneck Set & Carry Bag

980700 Carry Bag (only)
980000 Stifneck Set (All sizes) in Carry Bag

Paediatric and Baby No-Neck collars offer a rear panel opening for palpation, visualisation, and ventilation.

Picture showing Carry Bag, with a suggestion of items that can be easily stored and then carried onto the scene. Contents not included.
BaXstrap Spineboard

Engineered for maximum strength and designed for both patient and provider comfort

As a rescuer, you want your spineboard to be comfortable for your patient, rigid and lightweight. The BaXstrap Spineboard provides this and is one of the lightest boards on the market. The unique contoured design allows the board to nest compactly. This feature also offers patients more comfort, making it less likely that they would move around and aggravate their injuries.

Private Label Your Board!

*Minimum order quantity is 10 boards. Please allow 8-12 weeks leadtime for these versions.

982500  BaXstrap Spineboard
982600  BaXstrap Spineboard, Green
982599  Private Label BaXstrap Spineboard*
982699  Private Label BaXstrap Spineboard, Green*
980800  Baxstrap Carry Bag

Laerdal Spineboard Straps

Straps are two-piece, totaling 150 cm in length, with Dual Side Release DELRIN Buckles.

A 982512  Premium Strap w/loop-lock ends
B 982513  Premium Strap w/swivel speed clip ends
982517  Best Straps (spider style strapping system)

Multiple strap holes allow for paediatric strapping and do not interfere with hand holds.

Lifting is made easier for the rescuer with raised handholds designed to maximise ground clearance.

Can easily be stored. Three boards stacked together are only 140 mm thick.
Laerdal Pedi-Pad **Backboard Pad**

*It’s the foam, anti-skid kid disposable pad that provides proper alignment with any spineboard! Pedi-Pad works for kids*

701-00040 Laerdal Pedi-Pad Backboard Pad (pkg. 6)

---

**SpeedBlocks** **Head Immobiliser**

*Our reusable SpeedBlocks go to the head of the immobilisation class with easy application, secure and safe adjustments, and optimum visual access...all at the per-use cost of a disposable!*

SpeedBlocks offer a simple, four-step process for application, a unique, multi-axis blocks system to accommodate all head shapes and injury positions, and direct access to patient’s ears for better communication and inspection. The low-cost blocks with disposable foam pads and head straps are so effective that the inconvenience of taping the patient can be eliminated.

983090 SpeedBlocks Starter Pack
(Includes 1 Block Set, 1 Universal Base, 1 Strap & Pad Replacement Set)

983092 SpeedBlocks Blocks Set

983060 SpeedBlocks Universal Base

983096 SpeedBlocks Strap and Pad Replacement Set
(Includes 5 complete sets of Block Pads, Head Straps, and Base Pads)

---

www.laerdal.com
HeadBed II Head Immobiliser

All the strength of corrugated board in an all-weather secured, disposable immobiliser

Space is always at a premium in an ambulance, so every inch of storage space must count. The HeadBed II Head Immobiliser is so compact that ten can be stored in the same space as only one foam device.

982000  HeadBed II HID
980016  Stifneck Select/HeadBed II HID Combo Pack
(1 of each)

PadPack Alignment Pads

All the strength of corrugated board in an all-weather secured, disposable immobiliser

In most cases padding is necessary to maintain the cervical spine in neutral alignment during immobilisation. Place a pad under the occiput of an adult to prevent extension, and under the torso of a young child or infant to prevent flexion.

982100  PadPack Alignment Pads (pkg. 10)
“Issues in Spinal Care”

Training Curriculum CD 2005 Edition

The classic spinal care training curriculum is now revised and updated!

The 2005 Edition presents concepts and techniques of spinal motion restriction in four independent modules: adult, paediatric, aquatics, and spinal field rule-out. Most of the updates are in the aquatics section. Independently and expertly reviewed by the Minnesota State Colleges and Universities Fire/EMS/Safety Center and the physicians listed on their Medical Advisory Committee.

For more information or a free “Issues in Spinal Care” CD, please visit us at www.laerdal.com

Spinal System Solutions Sets

981000 Immobilisation Package with loop-lock end straps - Includes BaXstrap Spineboard, Adult Stifneck Select, SpeedBlocks Starter Pack and 4 loop-lock end straps

981100 Immobilisation Package with swivel speed clip end straps - Includes BaXstrap Spineboard, Adult Stifneck Select, SpeedBlocks Starter Pack and 4 swivel speed clip end straps.
Do you want the benefits of simulation but are not sure how to begin?

Educating future healthcare providers is a huge responsibility. Do you feel that you have too many demands on your time and yet would like to give more time to your students? Have you heard of the benefits of simulation as an educational tool, but are daunted by the prospect of installing and maintaining a simulation laboratory and programming simulators? This is where Laerdal Services come into their own.

We are here to listen, consult and to help you fulfil your educational objectives. We provide training, product updates, technical services, preventative maintenance, warranty programs and so much more.

Laerdal Services allow you to spend more time on what really matters - your students.

Technical Services

Laerdal takes great pride in our customer service before and after the sale. Our Technical Services Team genuinely cares for customers and your satisfaction is our top priority. We recognise that our product performance directly impacts your goals and objectives. Timely, convenient and quality service is the foundation of our success.

Professional Product Installations

Laerdal’s Installation Service is engineered to provide the customer with worry-free set-up of the product combined with basic operator training at their facility. This program will help expedite and facilitate integration of the customer’s equipment into their educational curriculum and ensure its proper utilisation.

Preventative Maintenance Programs

Preventative Maintenance Programs are the simplest way to control costs with planned maintenance services versus unplanned corrective services. With each scheduled service, a qualified Service Technician will ensure that your product maintains peak performance through our extensive testing and calibration process, replacing a range of parts and consumables to ensure its continued proper operation.

Extended Warranty

The Extended Warranty offers a continuation of the comprehensive original product warranty. Extended Warranties are offered for a range of products and can be purchased in single-year increments.

Technical Product Phone Support

Laerdal offers all customers comprehensive product support from our highly-skilled Technical Product Specialists.

Return to Bench Product Repair

Laerdal provides a full range of repair and calibration services. Our service technicians will ensure your product is returned to optimal condition and performance. Your product will undergo extensive testing, repair and calibration to ensure its reliability.

Laerdal Services

Educational Services

Courses

Laerdal now offers initial and advanced training courses designed to enable you to get the most out of your educational program using our products. Courses are held at the customer’s site.

**Introduction Courses**

These one-day basic courses enable participants to assemble their simulators, operate the simulator’s user interface, and plan and program scenarios using an instructional design process.

- 210-90150 Introduction to SimMan/SimBaby On-Site
- 212-90150 Introduction to SimMan 3G On-Site Course
- 225-90150 Introduction to SimNewB On-Site
- 459-09950 Introduction to MicroSim On-Site

Learn how to use MicroSim to its highest potential as part of your educational program.

**Scenario Programming**

This one day course gives participants the knowledge and skills to map out patient cases and convert them into scenarios using the SimMan/SimBaby software. Participants will also learn how to run these scenarios.

- 210-90550 Scenario programming SimMan/SimBaby On-Site
- 212-90550 Scenario Programming SimMan 3G On-Site
- 225-90550 Scenario Programming SimNewB Advanced

**Customised Educational Services**

For those who prefer a more customised, one-on-one experience, Laerdal offers a customised service to suit your individual needs. Educational Consultants will work with you at your facility to provide a learning experience to address your needs. They can also work with you, using your learning objectives and goals, to turn them into a working scenario for your curriculum.

- 210-90450 Customised Instruction
- 210-91050 Custom Scenario Development
Scenarios

Simulation Patient Scenarios
Laerdal now offers a range of preconfigured scenarios which enable you to quickly and easily deliver high-quality, tried and tested simulations, with all the support materials you need. New scenario packages are being developed and launched regularly.

We currently have a range of scenarios available that have been developed in the US and several that have been prepared in Australia in collaboration with leading educational institutions.*

211-17001 NLN SimMan Nursing Scenarios
These 10 surgical scenarios and 10 medical scenarios are designed to challenge students at different levels. The package includes basic and advanced scenarios. Cases range from obtaining vital signs, through recognising and managing life-threatening complications.

Includes:
- Pre-programmed scenarios
- Patient Information Card
- “Simulation in Nursing Education” book
- Patient ID bands
- Data collection forms
- Physician orders

80-1459 ACLS SimMan Scenarios
Laerdal and the American Heart Association have released the American Heart Association ACLS Scenarios that run on the Laerdal SimMan patient simulator. The scenarios are pre-programmed and can be used to teach, reinforce and test the skills required on the latest AHA ACLS course.

There are 31 scenarios, including five teaching scenarios, 22 core cases and four testing scenarios.

Includes:
- Binder with resource materials
- CD with the scenarios programmed for SimMan software
- ACLS Instructor Manual
- ACLS Provider Manual

These scenarios above run on the latest SimMan software version.

Those who wish to use the scenarios must upgrade their software.

You can upgrade your software via a Backwards Compatibility Kit, available from Laerdal.

SimMan 3G Patient Cases Sample Package
10 Patient Cases to jumpstart your simulation program. This package, included with the purchase of every SimMan 3G, consists of sample Patient Cases from topics such as airway complications, bleeding, cardiac emergencies and head injuries.

212-30150 SimMan 3G Patient Cases Vol I
Run validated, realistic simulations with ease using this package of 15 Patient Cases for SimMan 3G. Five modules are included, Airway I & 2, Bleeding, Cardiac and Head, each containing several Patient Cases.

Australian Developed Scenarios.

211-17315 SimMan Scenarios Undergraduate Nursing Vol I *
10 pre-programmed and validated cases included in this Undergraduate Nursing Scenarios Binder have been developed in collaboration between Monash University’s Centre for Medical & Health Sciences Education and Laerdal Australia. The patient cases address major learning objectives geared toward the care of patients with a variety of complications, both basic and advanced; including Chest Pain, Breathlessness and Hyperglycaemia.

211-17615 SimMan Scenarios: Postgraduate Nursing Vol I *
20 pre-programmed and validated cases included in this Postgraduate Nursing Vol I support binder are developed in collaboration between Edith Cowan University and Laerdal Australia. The patient cases in this binder address major learning objectives geared toward the care of patients with a variety of complications, both basic and advanced; including Post-Partum Haemorrhage, Bradycardia and Septic shock.

211-17415 SimMan Scenarios: Emergency Care (Inhospital) Vol I *
14 pre-programmed and validated cases included in this support binder are developed in collaboration between Medical Education Solutions and Laerdal Australia. The patient cases in this binder address major learning objectives geared toward the emergency care of patients with a variety of complications primarily designed for in-hospital settings; however the scenarios have validity also in other settings. Some include: Pregnant Trauma, Myocardial Infarct / Ventricular Tachycardia and Drug-Induced Anaphylaxis with intubation.
High quality adult CPR training

The Resusci Anne Basic and Resusci Anne SkillGuide manikins offer optimal realism and quality to adult CPR education. With its modular construction, and use of the optional SkillGuide performance indicator, students can quickly sharpen their skills in performing adult CPR at its highest quality. Add first aid or rescue limbs to integrate first aid, trauma, and extrication to the training.

Resusci Anne Full-Body comes standard with non-articulating arms and legs. First Aid Trauma Modules available, see page 22.

Torso/Full-Body Manikin, 4 Decorated Resusci Manikin Faces, 3 Disposable Manikin Airways, Carrying Case or Soft Pack, Track Suit (Full-Body Models) or Jacket (Torso Models), Directions for Use and Virkon Rapid Pack. Models listed as “SkillGuide” include the SkillGuide unit.

15 22 50  Airways 700-1000 ml (pkg. 24)
15 26 00  Airways 400-600 ml (pkg. 24)
31 02 10  Face Skin (pkg. 6)
31 02 20  Face Skin, decorated (pkg. 6)

220-17415 SimNewB Scenarios Vol.1 *

The SimNewB Neonatal Simulator scenarios module contains 10 different scenarios that address major learning objectives geared towards both basic and advanced neonatal resuscitation. The simulation scenarios are designed to encourage participants to assess and manage neonatal resuscitation. The learning objectives and the case scenarios have been developed to focus on neonatal resuscitation treatment. Patient cases include: Normal birth, Unexpected newborn depression and Birth of an asphyxiated baby.

Simulation User Network (SUN)
http://simulation.laerdal.com

The Simulation User Network is a community of simulation learners, users and experts, giving them a forum to share ideas and strategies for improving healthcare training for all professionals through the use of simulation.

The Network allows you to stay up-to-date on best practices, news, events and access a range of resources.

The SUN website provides information on events, tutorials, links, discussion forums, downloads, research and more.

Laerdal also provides SUN conferences throughout the year, bringing together simulation users throughout your region.
Contact Laerdal for details.
Provides high level CPR training for professional rescuers where feedback and skill optimisation is required. The Resusci Anne SkillReporter is an adult CPR training manikin that focuses on student performance through printed reports on ventilation and compression compliance. In addition, first aid and extrication practice can be incorporated into the learning by adding the optional first aid and rescue limbs.

Resusci Anne T orso SkillReporter w/Hard Case
Resusci Anne Full-Body SkillReporter w/Hard Case
Resusci Anne CPR Manikin Includes:
Torso/Full-Body Manikin, 4 Decorated Resusci Manikin Faces, 3 Disposable Manikin Airways, Carry Case, Track Suit (Full-Body Models) or Jacket (Torso Models), SkillReporter unit with 1 roll of Printer Paper, Directions for Use and Virkon Rapid Pack.

Paper for SkillReporter (pkg. 5)
Manikin Face Shields (6 rolls of 36 each)

The story of our logo

The Laerdal Company was established in 1940. During our first two decades, we created innovative toys and books for children.

In 1958, the company started to dedicate itself to advancing the cause of resuscitation and emergency care. In 1960, the first patient simulator Resusci Anne manikin was introduced to the market. A new logo was needed to reflect our mission. Our founder, Åsmund S. Laerdal, chose the image of the Good Samaritan. It depicts the ancient tale of the traveller whose selfless compassion and care saved the life of a total stranger. This became our emblem and our inspiration.

Today, Laerdal Medical is dedicated to helping save lives with products, services, and system solutions that support the Chain of Survival. The Good Samaritan logo symbolises our commitment to every health professional and volunteer who has learned how to save the life of a family member, friend, or stranger in need.

They are the true Good Samaritans.
